Focal distance

CCD-TR57/TR67/TR87/TR413PK/
TR414PK : 3/16 - 2 5/8 in. (4.1 - 65.6
mm)
CCD-TR917/TR940/TR940PK : 3/16 -
8 in. (4.1 - 73.8 mm)
When converted to a 35 mm still
camera
CCD-TR57/TR67/TR413PK : 1 9/16 -
24 7/8 in. (39.4 - 630 mm)
CCD-TR87/TR414PK : 1 7/8 - 29 3/4
in. (47.2 - 755 mm)
CCD-TR917/TR940/TR940PK : 1 7/8 -
33 1/2 in. (47.2 - 850 mm)
Color temperature
Auto
Minimum illumination*
CCD-TR57/TR67 : 0.4 lux (F 1.4)
CCD-TR413PK : 0.4 lux (F
1.4)(Visible minimum low light 0.2 lux)
CCD-TR87/TR414PK/TR917/TR940/
TR940PK : 0.7 lux (F 1.4)
CCD-TR917/TR940/TR940PK : 0 lux
(in NightShot mode)**

* Minimum illumination
expresses the light level a camcorder
requires to produce a picture. Visible
minimum low light expresses the
light level to produce a visible signal.
**Object invisible for the dark can be
shot with infrared lighting.

Illumination range

CCD-TR57/TR67/TR413PK : 0.4 lux
to 100,000 lux
CCD-TR87/TR414PK/TR917/TR940/
TR940PK : 0.7 lux to 100,000 lux
Recommended illumination
More than 100 lux

Input and output connectors

AC power adaptor

Power requirements
100 -240 V AC, 50/60 Hz
Power consumption
23 W
Output voltage
DC OUT: 8.4 V, 1.5 A in operating
mode
Operating temperature
32°F to 104°F(0°C to 40°C)
Storage temperature
-4°F to +140°F(-20°C to +60°C)
Dimensions (Approx.)
5 x 1 9/16 x 2 1/2 in. (125 x 39 x 62
mm)(w/h/d) excluding projecting parts
Mass (Approx.)
9.8 oz (280 g) excluding power cord

Design and specifications are subject to
change without notice.

SAFETY CHECK-OUT

After correcting the original service problem, perform the following
safety checks before releasing the set to the customer:

1. Check the area of your repair for unsoldered or poorly-soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the interboard wiring to ensure that no wires are "pinched" or contact high-wattage resistors.
3. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
4. Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
5. Check the B+ voltage to see it is at the values specified.
6. Flexible Circuit board Repairing
 - Keep the temperature of the soldering iron around 270°C during repairing.
 - Do not touch the soldering iron on the same conductor of the circuit board (within 3 times).
 - Be careful not to apply force on the conductor when soldering or unsoldering.

SAFETY-RELATED COMPONENT WARNING !!

COMPONENTS IDENTIFIED BY MARK $\triangle$ OR DOTTED LINE WITH MARK $\triangle$ ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

**ATTENTION AU COMPOSANT AYANT RAPPORT
À LA SÉCURITÉ!!**

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE $\triangle$ SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

Supplied accessories

- 1 Wireless Remote Commander (1)**
Except CCD-TR57
- 2 AC-L10A/L10B/L10C AC power adaptor**
- 3 NP-F330 Battery pack (1)**
- 4 CR2025 Lithium Battery (1)**
The lithium battery is already installed in your camcorder.
- 5 Size AA (R6) battery for Remote Commander (2)**
- 6 A / V connecting cable (1)**
Stereo : CCD-TR917/TR940/TR940PK
Monaural : Except CCD-TR917/TR940/TR940PK
- 7 Shoulder strap (1)**
- 8 Battery case (1)**
CCD-TR67/TR87/TR940
- 9 2 pin conversion adaptor (1)**
CCD-TR413PK/TR414PK/TR940PK

SERVICE NOTE

1. POWER SUPPLY DURING REPAIRS

In this unit, about 10 seconds after power is supplied (8.4V) to the battery terminal using the service power cord (J-6082-223-A), the power is shut off so that the unit cannot operate.

The following two methods are available to prevent this. Take note of which to use during repairs.

Method 1.

Connect the servicing remote commander RM-95 (J-6082-053-B) to the LANC jack, and set the remote commander switch to the "ADJ" side.

Method 2.

Use the DC IN terminal. (Use the AC power adaptor.)

2. TO TAKE OUT A CASSETTE WHEN NOT EJECT (FORCE EJECT)

- ① Refer to 2-1. to remove the front panel block.
- ② Refer to 2-2. to remove the cabinet (R) block.
- ③ Refer to 2-6. to remove the battery panel block.
- ④ Refer to 2-8. to remove the cabinet (L) block.
- ⑤ Add +5V from the DC POWER SUPPLY and unload with a pressing the cassette lid.

- ⑦ Let go your hold the cassette lid and rise the cassette compartment to take out a cassette.

SELF-DIAGNOSIS FUNCTION

1. Self-diagnosis Function

When problems occur while the unit is operating, the self-diagnosis function starts working, and displays on the viewfinder what to do. This function consists of two display; self-diagnosis display and service mode display.

Details of the self-diagnosis functions are provided in the Instruction manual.

2. Self-diagnosis display

When problems occur while the unit is operating, the counter of the viewfinder shows a 4-digit display consisting of an alphabet and numbers, which blinks at 3.2 Hz. This 5-character display indicates the “repaired by:”, “block” in which the problem occurred, and “detailed code” of the problem.

3. Service Mode Display

The service mode display shows up to six self-diagnosis codes shown in the past.

3-1. Display Method

While pressing the “STOP” key, set the switch from OFF to “VTR or PLAYER”, and continue pressing the “STOP” key for 5 seconds continuously. The service mode will be displayed, and the counter will show the backup No. and the 5-character self-diagnosis codes.

3-2. Switching of Backup No.

By rotating the control dial, past self-diagnosis codes will be shown in order. The backup No. in the [] indicates the order in which the problem occurred. (If the number of problems which occurred is less than 6, only the number of problems which occurred will be shown.)

- | | |
|----------------------------|------------------------------|
| [1] : Occurred first time | [4] : Occurred fourth time |
| [2] : Occurred second time | [5] : Occurred fifth time |
| [3] : Occurred third time | [6] : Occurred the last time |

3-3. End of Display

Turning OFF the power supply will end the service mode display.

Note: The self-diagnosis display data will be backed up by the coin-type lithium battery. When this coin-type lithium battery is disconnected, the self-diagnosis data will be lost by initialization.

4. Self-diagnosis Code Table

Repaired by:	Self-diagnosis Code					Symptom/State	Correction
	Block	Function	Detailed	Code			
C	2	1	0	0		Condensation.	Remove the cassette, and insert it again after one hour.
C	2	2	0	0		Video head is dirty.	Clean with the optional cleaning cassette.
C	2	3	0	0		Non-standard battery is used.	Use the InfoLITHIUM battery.
C	3	1	1	0		LOAD direction. Loading does not complete within specified time	Load the tape again, and perform operations from the beginning.
C	3	1	1	1		UNLOAD direction. Loading does not complete within specified time	Load the tape again, and perform operations from the beginning.
C	3	1	2	0		T reel side tape slacking when unloading.	Load the tape again, and perform operations from the beginning.
C	3	1	2	1		S reel side tape slacking when unloading.	Load the tape again, and perform operations from the beginning.
C	3	1	2	2		T reel fault	Load the tape again, and perform operations from the beginning.
C	3	1	2	3		S reel fault	Load the tape again, and perform operations from the beginning.
C	3	1	3	0		FG fault when starting capstan	Load the tape again, and perform operations from the beginning.
C	3	1	3	1		FG fault during normal capstan operations	Load the tape again, and perform operations from the beginning.
C	3	1	4	0		FG fault when starting drum	Load the tape again, and perform operations from the beginning.
C	3	1	4	1		PG fault when starting drum	Load the tape again, and perform operations from the beginning.
C	3	1	4	2		FG fault during normal drum operations	Load the tape again, and perform operations from the beginning.
C	3	1	4	3		PG fault during normal drum operations	Load the tape again, and perform operations from the beginning.
C	3	1	4	4		Phase fault during normal drum operations	Load the tape again, and perform operations from the beginning.
C	3	2	1	0		LOAD direction loading motor time-out	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	1	1		UNLOAD direction loading motor time-out	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	2	0		T reel side tape slacking when unloading.	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	2	1		S reel side tape slacking when unloading.	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	2	2		T reel fault	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	2	3		S reel fault	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	3	0		FG fault when starting capstan	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	3	1		FG fault during normal capstan operations	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	4	0		FG fault when starting drum	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	4	1		PG fault when starting drum	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	4	2		FG fault during normal drum operations	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	4	3		PG fault during normal drum operations	Remove the battery or power cable, connect, and perform operations from the beginning.
C	3	2	4	4		Phase fault during normal drum operations	Remove the battery or power cable, connect, and perform operations from the beginning.
E	6	1	0	0		Difficult to adjust focus (Cannot initialize focus.)	Inspect the lens block focus reset sensor (Pin ①⑨ of CN551 of VC-195 board) when focusing is performed when the focus dial is rotated in the focus manual mode and the focus motor drive circuit (IC552 of VC-195 board) when the focusing is not performed. Note : Use the remote commander RM-95 only for the model without the focus dial.
E	6	1	1	0		Zoom operations fault (Cannot initialize zoom lens.)	Inspect the lens block zoom reset sensor (Pin ②① of CN551 of VC-195 board) when zooming is performed when the zoom lens is operated and the zoom motor drive circuit (IC552 of VC195 board) when zooming is not performed.
E	6	2	0	0		Handshake correction function does not work well.(With pitch angular velocity sensor output stopped)	Inspect pitch angular velocity sensor (SE451 of SE-65 board) peripheral circuits.
E	6	2	0	1		Handshake correction function does not work well.(With yaw angular velocity sensor output stopped)	Inspect yaw angular velocity sensor (SE452 of SE-65 board) peripheral circuits.

SECTION 1 GENERAL

This section is extracted from instruction manual of CCD-TR57/TR67/TR87/TR917/TR940.

Before you begin

Using this manual

The instructions in this manual are for the six models listed below. Before you start reading this manual and operating the unit, check your model number by looking at the bottom of your camcorder. The CCD-TR917/TR940 is the model used for illustration purposes. Otherwise, the model name is indicated in the illustrations. Any differences in operation are clearly indicated in the text, for example, "CCD-TR917/TR940 only." As you read through this manual, buttons and settings on the camcorder are shown in capital letters.

e.g. Set the POWER switch to CAMERA.

You can hear the beep sound to confirm your operation.

Types of differences

* The models without VIDEO/AUDIO IN have CAMERA, OFF and PLAYER mode on the POWER switch.

Using this manual

Note on TV color systems

TV color systems differ from country to country. To view your recordings on a TV, you need an NTSC system-based TV.

Precaution on copyright

Television programs, films, video tapes, and other materials may be copyrighted. Unauthorized recording of such materials may be contrary to the provision of the copyright laws.

Precautions on camcorder care

- The LCD screen and/or the color viewfinder are manufactured using high-precision technology. However, there may be some tiny black points and/or bright points (red, blue or green in color) that constantly appear on the LCD screen and/or in the viewfinder. These points are normal in the manufacturing process and do not affect the recorded picture in any way. Over 99.99% are operational for effective use.
- Do not let the camcorder get wet. Keep the camcorder away from rain and sea water. Letting the camcorder get wet may cause the unit to malfunction, and sometimes this malfunction cannot be repaired [a].
- Never leave the camcorder exposed to temperatures above 140°F (60°C), such as in a car parked in the sun or under direct sunlight [b].

[a]

[b]

Checking supplied accessories

Check that the following accessories are supplied with your camcorder.

- 1 Wireless Remote Commander (1) (p. 76)
CCD-TR67/TR87/TR917/TR940 only
- 2 AC-L10A/L10B/L10C AC power adaptor (1), Power cord (1) (p. 8, 23)
- 3 NP-F330 Battery pack (1) (p. 7, 23)
- 4 CR2025 Lithium Battery (1) (p. 54)
The lithium battery is already installed in your camcorder.
- 5 Size AA (R6) battery for Remote Commander (2) (p. 76)
CCD-TR67/TR87/TR917/TR940 only
- 6 A/V connecting cable (1) (p. 19)
*for stereo model
- 7 Shoulder strap (1) (p. 77)
- 8 Battery case (1) (p. 24)
CCD-TR67/TR87/TR940 only

Contents of the recording cannot be compensated if recording or playback is not made due to a malfunction of the camcorder, video tape, etc.

Getting started

Installing and charging the battery pack

Before using your camcorder, you first need to install and charge the battery pack.

Installing the battery pack

- (1) While pressing BATT RELEASE, slide the lower battery terminal cover in the direction of the arrow.
- (2) Install the battery pack in the direction of the ▼ mark on the battery pack. Slide the battery pack down until it catches on the battery release lever and clicks. Attach the battery pack to the camcorder securely.

Note on the battery pack

Do not carry the camcorder by grasping the battery pack.

Installing and charging the battery pack

Charging the battery pack

Charge the battery pack on a flat surface without vibration. The battery pack is charged a little in the factory.

- (1) Open the DC IN jack cover and connect the supplied AC power adaptor to the DC IN jack with the plug's ▲ mark up.
- (2) Connect the power cord to the AC power adaptor.
- (3) Connect the power cord to a wall outlet.
- (4) Slide the POWER switch to OFF. Remaining battery time is indicated by the minutes on the display window. Charging begins.

When the remaining battery indicator becomes , normal charge is completed. For full charge, which allows you to use the battery longer than usual, leave the battery pack attached for about 1 hour after normal charge is completed until FULL appears in the display window. Unplug the AC power adaptor from the camcorder. You can also use the battery pack before it is completely charged. Before using the camcorder with the battery pack, unplug the AC power adaptor from the DC IN jack of the camcorder.

Notes

- * "— min" appears on the display until the camcorder calculates remaining battery time.
- * Remaining battery time indication in the display window roughly indicates the recording time. Use it as a guide. It may differ from the actual recording time.

8

Installing and charging the battery pack

Charging time

Battery pack	NP-F330 (supplied)	NP-F530 NP-F550	NP-F730 NP-F730H / F750	NP-F930 NP-F950
Charging time* (min.)	150 (90)	210 (150)	300 (240)	390 (330)

The time required for a normal charge is indicated in parentheses.

* Approximate minutes to charge an empty battery pack using the supplied AC power adaptor. (Lower temperatures require a longer charging time.)

Battery life

CCD-TR57/TR67

Battery pack	NP-F330 (supplied)	NP-F530 NP-F550	NP-F730 NP-F730H / F750	NP-F930 NP-F950
Continuous recording time*	135 (120)	235 (210) 270 (240)	475 (425) 550 (500)	745 (670) 850 (760)
Typical recording time**	70 (60)	120 (110) 140 (125)	250 (225) 290 (265)	390 (355) 450 (400)

CCD-TR87

Battery pack	NP-F330 (supplied)	NP-F530 NP-F550	NP-F730 NP-F730H / F750	NP-F930 NP-F950
Continuous recording time*	130 (115)	225 (200) 260 (230)	450 (405) 530 (480)	710 (640) 815 (730)
Typical recording time**	65 (60)	115 (105) 135 (120)	235 (210) 280 (250)	375 (335) 430 (385)

CCD-TR917/TR940

Battery pack	NP-F330 (supplied)	NP-F530 NP-F550	NP-F730 NP-F730H / F750	NP-F930 NP-F950
Continuous recording time*	125 (110)	215 (190) 250 (220)	430 (385) 510 (460)	680 (610) 780 (700)
Typical recording time**	65 (55)	110 (100) 130 (115)	225 (200) 270 (240)	360 (320) 410 (370)

Numbers in parentheses indicate the time when you use a normally charged battery. Battery life will be shorter if you use the camcorder in a cold environment.

* Approximate continuous recording time at 77°F (25°C).

** Approximate minutes when recording while you repeat recording start/stop, zooming and turning the power on/off. The actual battery life may be shorter.

Getting started

9

Installing and charging the battery pack

Note on remaining battery time indication during recording

Remaining battery time is displayed in the viewfinder. However, the indication may not be displayed properly, depending on using conditions and circumstances.

To remove the battery pack

While pressing BATT RELEASE, slide the battery pack in the direction of the arrow.

You can look at the demonstration of the functions available with this camcorder (p. 28).

10

Inserting a cassette

Make sure that the power source is installed. When you want to record in the Hi8 system, use Hi8 video cassette  (CCD-TR917/TR940 only).

- (1) While pressing the small blue button on the EJECT switch, slide it in the direction of the arrow. The cassette compartment automatically lifts up and opens.
- (2) Insert a cassette with the window facing out.
- (3) Close the cassette compartment by pressing the "PUSH" mark on the cassette compartment. The cassette compartment automatically goes down.

To eject the cassette

While pressing the small blue button on the EJECT switch, slide it in the direction of the arrow.

To prevent accidental erasure

Slide the tab on the cassette to expose the red mark. If you insert the cassette with the red mark exposed and close the cassette compartment, the beeps sound for a while. If you try to record with the red mark exposed, the  and  indicators flash, and you cannot record.

To re-record on this tape, slide the tab back out covering the red mark.

Getting started

11

Basic operations

Camera recording

Make sure that the power source is installed and a cassette is inserted and that the START/STOP MODE switch is set to Δ . Before you record one-time events, you may want to make a trial recording to make sure that the camcorder is working correctly. When you use the camcorder for the first time, power on it and reset the date and time to your time before you start recording (p. 57). The date is automatically recorded for 10 seconds after you start recording (AUTO DATE feature). This feature works only once a day.

- (1) While pressing the small green button on the POWER switch, set it to CAMERA.
- (2) Turn STANDBY up to STANDBY.
- (3) Press START/STOP. The camcorder starts recording. The "REC" indicator appears. The camera recording/battery lamp located on the front of the camcorder also lights up.

Camera recording

To stop recording momentarily [a]

Press START/STOP again. The "STBY" indicator appears in the viewfinder (Standby mode).

To finish recording [b]

Press START/STOP again. Turn STANDBY down to LOCK and set the POWER switch to OFF. Then, eject the cassette.

Note

For getting remaining battery time indicated correctly, leave the battery pack installed after use. Wear of the battery pack which is installed with the camcorder is a little. As an exception, be sure to remove the battery pack from the model having the built-in light after recording (CCD-TR67/TR87/TR917/TR940 only).

To focus the viewfinder lens

If you cannot see the indicators in the viewfinder clearly, or after someone else has used the camcorder, focus the viewfinder lens. Move the viewfinder lens adjustment lever so that the indicators in the viewfinder come into sharp focus.

Note on the lighting aperture

If direct sunlight enters the lighting aperture, the picture in the viewfinder appears brighter. When this happens, colors in the viewfinder may change.

Note on Standby mode

If you leave the camcorder in Standby mode for 5 minutes while the cassette is inserted, the camcorder turns off automatically for saving battery power as well as for preventing the battery and tape from wearing down. To resume Standby mode, turn STANDBY down and up again. To start recording, press START/STOP.

Note on recording

When you record from the beginning of a tape, run the tape for about 15 seconds before starting the actual recording. This will ensure that you won't miss any start-up scenes when you play back the tape.

Basic operations

12

13

Camera recording

Notes on the tape counter

- The tape counter indicates the recording or playback time. Use it as a guide. There will be a time lag of several seconds from the actual time. To set the counter to zero, press COUNTER RESET.
- If the tape is recorded in SP and LP modes mixed, the tape counter shows incorrect recording time. When you intend to edit the tape using the tape counter as a guide, record in same (SP or LP) mode.

Note on the beep sound

The beep sounds when you operate the camcorder. Several beeps also sound as a warning of any unusual condition of the camcorder. Note that the beep sound is not recorded on the tape. If you do not want to hear the beep sound, select "OFF" in the menu system.

Note on the AUTO DATE feature

The clock is set to East Coast Standard Time at the factory. You can reset the clock in the menu system. You can change the AUTO DATE settings by selecting ON or OFF in the menu system. The AUTO DATE feature shows the date automatically once a day. However, the date may automatically appear more than once a day when:

- you reset the date and time.
- you eject and insert the tape again.
- you stop recording within 10 seconds.
- you set AUTO DATE to OFF once and set it to ON again in the menu system.

Camera recording

Using the zoom feature

Zooming is a recording technique that lets you change the size of the subject in the scene.

For more professional-looking recordings, use the zoom function sparingly.

"T" side: for telephoto (subject appears closer)

"W" side: for wide-angle (subject appears farther away)

Zooming speed (Variable speed zooming)

Move the power zoom lever a little for a slower zoom, move it further for a faster zoom.

When you shoot a subject using a telephoto zoom

If you cannot get a sharp focus while in extreme telephoto zoom, move the power zoom lever to the "W" side until the focus is sharp. You can shoot a subject that is at least about 2 5/8 feet (about 80 cm) away from the lens surface in the telephoto position, or about 1/2 inch (about 1 cm) away in the wide-angle position.

Notes on digital zoom

- More than 16x (CCD-TR57/TR67/TR87) or 18x (CCD-TR917/TR940) zoom is performed digitally, and the picture quality deteriorates as you go toward the "T" side. If you do not want to use the digital zoom, set the D ZOOM function to OFF in the menu system.
- The right side [a] of the power zoom indicator shows the digital zooming zone, and the left side [b] shows the optical zooming zone. If you set the D ZOOM function to OFF, the [a] zone disappears.

Basic operations

14

15

Camera recording

Selecting the START/STOP mode

Your camcorder has three modes. These modes enable you to take a series of quick shots resulting in a lively video.

(1) Set START/STOP MODE to the desired mode.

▲ : Recording starts when you press START/STOP, and stops when you press it again (normal mode).

ANTI GROUND SHOOTING ▲ : The camcorder records only while you press down START/STOP so that you can avoid recording unnecessary scenes.

5SEC: When you press START/STOP, the camcorder records for 5 seconds and then stops automatically.

(2) Turn STANDBY up to STANDBY and press START/STOP. Recording starts.

If you selected 5SEC, the tape counter disappears and five dots appear. The dots disappear at a rate of one per second as illustrated below.

To extend the recording time in 5SEC mode

Press START/STOP again before all the dots disappear. Recording continues for about 5 seconds from the moment you press START/STOP.

Note on START/STOP mode

You cannot use FADER in 5SEC or ▲ mode (CCD-TR917/TR940 only).

Hints for better shooting

For hand-held shots, you'll get better results by holding the camcorder according to the following suggestions:

- Hold the camcorder firmly and secure it with the grip strap so that you can easily manipulate the controls with your thumb [a].
- Place your right elbow against your side.
- Place your left hand under the camcorder to support it. Be sure to not touch the built-in microphone.
- Place your eye firmly against the viewfinder eyecup.
- Use the viewfinder frame as a guide to determine the horizontal plane.
- You can also record in a low position to get an interesting angle. Lift the viewfinder up for recording from a low position [b].

[a]

[b]

Place the camcorder on a flat surface or use a tripod

Try placing the camcorder on a table top or any other flat surface of suitable height. If you have a tripod for a still camera, you can also use it with the camcorder. When attaching a non-Sony tripod, make sure that the length of the tripod screw is less than 9/32 inch (6.5 mm). Otherwise, you cannot attach the tripod securely and the screw may damage the camcorder.

Cautions on the viewfinder

- Do not pick up the camcorder by the viewfinder [c].
- Do not place the camcorder so as to point the viewfinder toward the sun. The inside of the viewfinder may be damaged. Be careful when placing the camcorder under sunlight or by a window [d].

[c]

[d]

16

Checking the recorded picture

Using EDITSEARCH, you can review the last recorded scene or check the recorded picture in the viewfinder.

(1) While pressing the small green button on the POWER switch, set it to CAMERA.

(2) Turn STANDBY up to STANDBY.

(3) Press the - (S) side of EDITSEARCH momentarily; the last few seconds of the recorded portion play back (Rec Review).

You can monitor the sound from headphones (CCD-TR917/TR940 only). Hold down the - side of EDITSEARCH until the camcorder goes back to the scene you want. The last recorded portion is played back. To go forward, hold down the + side (Edit Search).

To stop playback

Release EDITSEARCH.

To begin re-recording

Press START/STOP. Re-recording begins from the point you released EDITSEARCH. Provided you do not eject the cassette, the transition between the last scene you recorded and the next scene you record will be smooth.

Connections for playback

Connect the camcorder to your TV or VCR to watch the playback picture on the TV screen. When monitoring the playback picture by connecting the camcorder to your TV, we recommend you to use house current for the power source.

Connecting directly to a TV/VCR with Video/Audio input jacks

When connecting the A/V connecting cable, make sure you connect the plug to jacks of the same color.

Open the jack cover. With using the supplied A/V connecting cable, connect the camcorder to the LINE IN inputs on the TV or VCR connected to the TV. Set the TV/VCR selector on the TV to VCR. When connecting to the VCR, set the input selector on the VCR to LINE.

CCD-TR57/TR67/TR87

CCD-TR917/TR940

-CCD-TR917/TR940 only

If your TV or VCR has an S video jack, connect using the S video connecting cable (not supplied) [a] to obtain a high quality picture. If you are going to connect the camcorder using the S video connecting cable (not supplied) [a], you do not need to connect the yellow (video) plug of the A/V connecting cable [b].

18

19

Connections for playback

If your TV or VCR is a monaural type

—CCD-TR917/TR940 only

Connect only the white plug for audio on both the camcorder and the TV or the VCR. With this connection, the sound is monaural even in stereo model.

To connect to a TV or VCR without Video/Audio input jacks
Use an RFU-95UC RFU adaptor (not supplied).

Using the AV cordless IR receiver

—CCD-TR87/TR917/TR940 only

Once you connect the AV cordless IR receiver (not supplied) having the LASER LINK mark to your TV or VCR, you can easily view the picture on your TV. For details, refer to the operating instruction of the AV cordless IR receiver. LASER LINK is a system which transmits and receives a picture and sound between video equipment having the mark by using infrared rays. LASER LINK is a trademark of Sony Corporation.

To play back on a TV

- (1) After connecting your TV and AV cordless IR receiver, set the POWER switch on the AV cordless IR receiver to ON.
- (2) Set the POWER switch on the camcorder to VTR/PLAYER.
- (3) Turn the TV on and set the TV/VCR selector on the TV to VCR.
- (4) Press LASER LINK. The lamp of the LASER LINK button lights up.
- (5) Press on the camcorder to start playback.
- (6) Point the LASER LINK emitter at the AV cordless IR receiver.

To cancel the LASER LINK function

Press LASER LINK.

If you use a Sony TV

- You can turn on the TV automatically when you press the LASER LINK or button. To do so, set the AUTO TV ON to ON in the menu system and turn the TV's main switch on, then do either of the following:
 - Point the LASER LINK emitter towards the TV's remote sensor and press LASER LINK.
 - Turn on the LASER LINK button and press .
- You can switch the video input of the TV automatically to the one which the AV cordless IR receiver is connected. To do so, set the AUTO TV ON to ON and the TV INPUT to the same video input (1,2,3) in the menu system. With some models, However the picture and sound may be disconnected momentarily when the video input is switched.
- The above feature may not work with some TV models.

Note

When LASER LINK is activated (the LASER LINK button is lit), the camcorder consumes power. Press and turn off the LASER LINK button when it is not needed.

Playing back a tape

You can monitor the playback picture in the viewfinder. You can also monitor the picture on a TV screen, after connecting the camcorder to a TV or VCR.

- (1) While pressing the small green button on the POWER switch, set it to VTR (CCD-TR917/TR940) or PLAYER (CCD-TR57/TR67/TR87). The video control buttons light up (CCD-TR917/TR940 only).
- (2) Insert the recorded tape with the window facing out.
- (3) Press to rewind the tape.
- (4) Press to start playback.

- To stop playback, press .
- To rewind the tape, press .
- To fast-forward the tape rapidly, press .

Using the remote commander

—CCD-TR67/TR87/TR917/TR940 only

You can control playback using the supplied Remote Commander. Before using the Remote Commander, insert the size AA (R6) batteries.

To display the viewfinder screen indicators on the TV

Press DISPLAY on the remote Commander. To erase the indicators, press DISPLAY again.

Basic operations

21

Playing back a tape

Using headphones

Connect headphones (not supplied) to the jack (CCD-TR917/TR940 only).

Note on the lens cover

The lens cover does not open when the POWER switch is set to VTR/PLAYER. Do not open the lens cover manually. It may cause malfunction.

Various playback modes

You can enjoy pictures in the viewfinder during still, slow and picture search.

To view a still picture (playback pause)

Press during playback. To resume playback, press or .

To locate a scene (picture search)

Keep pressing or during playback. To resume normal playback, release the button.

To monitor the high-speed picture while advancing the tape or rewinding (skip scan)

Keep pressing while rewinding or while advancing the tape. To resume normal playback, press .

To view the picture at 1/5 speed (slow playback)

—CCD-TR67/TR87/TR917/TR940 only

Press on the Remote Commander during playback. To resume normal playback, press . If slow playback lasts for about 1 minute, it shifts to normal speed automatically.

To select the playback sound

—CCD-TR917/TR940 only

Change the "HiFi SOUND" mode setting in the menu system.

Notes on playback

- Noise may appear when you use the still/slow/picture search function to play back the tape recorded in LP mode.
- Streaks appear and the sound is muted in the various playback modes.
- When playback pause mode lasts for 5 minutes, the camcorder automatically enters stop mode.
- You can play back the tapes recorded in the Hi8 video system on the standard 8 mm camcorder (CCD-TR57/TR67/TR87 only).

Advanced operations

Using alternative power sources

You can choose any of the following power sources for your camcorder: battery pack, house current, alkaline batteries (CCD-TR67/TR87/TR940 only) and 12/24 V car battery. Choose the appropriate power source depending on where you want to use your camcorder.

Place	Power source	Accessory to be used
Indoors	House current	Supplied AC power adaptor
Outdoors	Battery pack	Battery pack NP-F330 (supplied), NP-F530, NP-F550, NP-F730, NP-F730H, NP-F750, NP-F930, NP-F950
	Size AA (LR6) Alkaline battery	Supplied battery case (CCD-TR67/TR87/TR940 only)
In the car	12 V or 24 V car battery	Sony car battery charger DC-V515A

Notes on power sources

- Disconnecting the power source or removing the battery pack during recording or playback may damage the inserted tape.
- The DC IN jack has priority over the battery pack for supplying the power. Even if you unplug the power cord from the wall outlet, the battery pack cannot supply the power to the camcorder as long as the AC power adaptor is connected to the DC IN jack.

Using the house current

- (1) Open the DC IN jack cover, and connect the AC power adaptor to the DC IN jack on the camcorder.
- (2) Connect the power cord to the AC power adaptor.
- (3) Connect the power cord to a wall outlet.

WARNING

The power cord must only be changed at a qualified service shop.

PRECAUTION

The set is not disconnected from the AC power source (house current) as long as it is connected to the wall outlet, even if the set itself has been turned off.

Note

Keep the AC power adaptor away from the camcorder if the picture is disturbed.

Advanced operations

23

Using alternative power sources

Using alkaline batteries

– CCD-TR67/TR87/TR940 only

Use the battery case (supplied) and six size AA (LR6) Sony Alkaline batteries (not supplied).

- (1) Remove the battery holder from the battery case.
- (2) Insert six new alkaline batteries into the battery holder, following the marking on the holder to be sure the batteries are installed in the correct direction.
- (3) Insert the battery holder with the alkaline batteries.
- (4) Insert the battery case with the alkaline batteries to the battery mounting surface of the camcorder in the same way as the battery pack.

Battery life

Using alkaline batteries at 77°F (25°C).

CCD-	TR67	TR87	TR940
Continuous recording time	330 min.	305 min.	285 min.
Typical recording time	170 min.	160 min.	150 min.

PRECAUTION

When the battery case is attached to the camcorder, do not connect the AC power adaptor.

Notes

- You may not use the battery case in cold environment.
- The battery life may be shorter depending on the using environment.
- The above battery lives are estimates. The battery life may be shorter depending on the storage condition of the battery before being purchased and temperature.

To remove the battery case

The battery case is removed in the same way as the battery pack.

When you replace the batteries, be sure to remove the battery case from the camcorder to prevent malfunction.

Remove the battery case after using it.

24

Changing the mode settings

You can change the mode settings in the menu system to further enjoy the features and functions of the camcorder.

- (1) Press MENU to display the menu.
- (2) Turn the control dial to select the desired icon in the left side of the menu, then press the dial.
- (3) Turn the control dial to select the desired item, then press the dial.
- (4) Turn the control dial to select the desired mode, and press the dial. If you want to change the other modes, repeat steps 3 and 4. If you want to change the other items, select $\Rightarrow$ RETURN and press the dial, then repeat steps from 2 to 4.
- (5) Press MENU or select $\Rightarrow$ icon to erase the menu display.

Note on the menu display

Depending on the model of your camcorder, the menu display may be different from that in this illustration.

26

Using alternative power sources

Using a car battery

Use Sony DC-V515A car battery charger (not supplied). Connect the car battery cord to the cigarette lighter socket of a car (12 V or 24 V). Refer to the operating instructions of your car battery charger.

To remove the car battery charger

The car battery charger is removed in the same way as the battery pack.

This mark indicates that this product is a genuine accessory for Sony video products. When purchasing Sony video products, Sony recommends that you purchase accessories with this "GENUINE VIDEO ACCESSORIES" mark.

Advanced operations

Changing the mode settings

Note on changing the mode setting

Menu items differ depending on the setting of the POWER switch to VTR/PLAYER or CAMERA.

Selecting the mode setting of each item

Items for both CAMERA and VTR/PLAYER modes

REC MODE* <SP/LP>

- Select SP when recording in SP (standard play) mode.

- Select LP when recording in LP (long play) mode.

When a tape recorded on this camcorder in LP mode is played back on other types of 8mm camcorders or VCRs, the playback quality may not be as good as that on this camcorder.

In PLAYER mode, this item is not displayed in the menu (CCD-TR57/TR67/TR87 only).

REMAIN* <AUTO/ON>

- Select AUTO when you want to display the remaining tape bar

- for about 8 seconds after the camcorder turns on and calculates the remainder of the tape.

- for about 8 seconds after a cassette is inserted and the camcorder calculates the remainder of the tape.

- for the period of tape rewinding, forwarding or picture search in VTR/PLAYER mode.

- for about 8 seconds after $\blacktriangleright$ is pressed in VTR/PLAYER mode.

- for about 8 seconds after DISPLAY on the remote commander is turned on (CCD-TR67/TR87/TR917/TR940 only).

- Select ON to always display the remaining tape indicator.

AUTO TV ON* <ON/OFF> (CCD-TR87/TR917/TR940 only)

You can use this feature only with Sony TVs.

- Select ON to turn on the TV automatically when using the LASER LINK function.

- Select OFF not to turn on the TV.

TV INPUT* <VIDEO1/VIDEO2/VIDEO3/OFF> (CCD-TR87/TR917/TR940 only)

Select 1 or 2 or 3 of the video input on the TV which the IR receiver (not supplied) is connected to when using the LASER LINK function.

LTR SIZE* <NORMAL/2x>

- Normally select NORMAL.

- Select 2x to display selected menu item by twice size of normal.

BEEP* <ON/OFF>

- Select ON so that beeps sound when you start/stop recording, etc.

- Select OFF when you do not want to hear the beep sound.

COMMANDER* <ON/OFF> (CCD-TR67/TR87/TR917/TR940 only)

- Select ON when using the supplied Remote Commander for the camcorder.

- Select OFF when not using the Remote Commander.

INDICATOR* <BL ON/BL OFF> (CCD-TR917/TR940 only)

- Select BL ON to light up the display window.

- Select BL OFF to turn off the back light of display window.

When you use the AC power adaptor as a power source, this item is not displayed in the menu.

Advanced operations

27

Changing the mode settings

Items for CAMERA mode only

[ZOOM] D ZOOM* <ON/OFF>

- Select ON to activate digital zooming.
- Select OFF to not use the digital zoom. The camcorder goes back to 16x (CCD-TR57/TR67/TR87) or 18x (CCD-TR917/TR940) zoom.

[WIDE] 16:9WIDE* <OFF/CINEMA/16:9FULL>

- Normally select OFF.
- Select CINEMA to record in CINEMA mode.
- Select 16:9FULL to record in 16:9FULL mode.

[STBY] STEADYSHOT* <ON/OFF> (CCD-TR87/TR917/TR940 only)

- Normally select ON.
- Select OFF to release the SteadyShot function.

[NIGHT] N.S.LIGHT* <ON/OFF> (CCD-TR917/TR940 only)

- Normally select ON.
- Select OFF to not use the NightShot Light function.

[WIND] WIND <ON/OFF> (CCD-TR917/TR940 only)

- Select ON to reduce wind noise when recording in strong wind.
- Normally select OFF.

[ARC] ORC TO SET*

Select this item to automatically adjust the recording condition to get the best possible recording.

[CLOCK] CLOCK SET*

Reset the date or time.

[DATE] AUTO DATE* <ON/OFF>

- Select ON to record the date for 10 seconds after recording has started.
- Select OFF to not record the date.

[DEMO] DEMO MODE* <ON/OFF>

- Select ON to make the demonstration appear.
- Select OFF to deactivate the demonstration mode.

Notes on DEMO MODE

- DEMO MODE is set to STBY (Standby) at the factory and the demonstration starts about 10 minutes after you set the POWER switch to CAMERA without inserting a cassette.
- Note that you cannot select STBY of DEMO MODE in the menu system.
- You cannot select DEMO MODE when a cassette is inserted in the camcorder.
- If you insert a cassette during the demonstration, the demonstration stops. You can start recording as usual. DEMO MODE automatically returns to STBY.
- When NIGHTSHOT is set to ON, "NIGHTSHOT" appears in the viewfinder and the demonstration does not start (CCD-TR917/TR940 only).

To look at the demonstration at once

Eject the cassette, if inserted. Select ON of DEMO MODE and erase the menu display. The demonstration will begin. When you turn off the camcorder once, DEMO MODE automatically returns to STBY.

28

Shooting with backlighting

When you shoot a subject with the light source behind the subject or a subject with a light background, use the BACK LIGHT function.

Press BACK LIGHT. The **[BL]** indicator appears in the viewfinder.

[a] Subject is too dark because of backlight.

[b] Subject becomes bright with backlight compensation.

After shooting

Be sure to release this adjustment condition by pressing BACK LIGHT again. The **[BL]** indicator disappears. Otherwise, the picture will be too bright under normal lighting condition.

This function is also effective under the following conditions:

- A subject with a light source nearby or a mirror reflecting light
- A white subject against a white background. Especially when you shoot a person wearing shiny clothes made of silk or synthetic fiber, his or her face tends to become dark if you do not use this function.

To make a fine adjustment

You can adjust the exposure manually. However, when you adjust the exposure manually, BACK LIGHT does not operate.

30

Changing the mode settings

[WORLD] WORLD TIME*

Select this item to set the clock by a time difference.

[LAMP] REC LAMP* <ON/OFF>

- Select OFF when you do not want the camera recording/battery lamp at the front of the unit to light up.
- Normally select ON.

Items for VTR/PLAYER mode only

[SOUND] HiFi SOUND <STEREO/1/2> (CCD-TR917/TR940 only)

- Normally select STEREO.
- Select 1 or 2 to play back a dual sound track tape.

[EDIT] EDIT <ON/OFF>

- Select ON to minimize picture deterioration when editing.
- Normally select OFF.

[TBC] TBC* <ON/OFF> (CCD-TR917/TR940 only)

- Normally select ON, to correct for jitter.
- Select OFF to not correct for jitter. The picture may not be steady when played back.

Note on TBC setting

Set TBC to OFF when:

- Playing back a tape you have dubbed over.
- Playing back a tape on which you recorded the signal of a TV game or similar machine.
- The playback picture fluctuates.

[DNR] DNR* <ON/OFF> (CCD-TR917/TR940 only)

- Normally select ON to reduce picture noise.
- Select OFF if the picture has a lot of movement, causing a conspicuous afterimage.

The following settings work only during playback

EDIT, HiFi SOUND, TBC, and DNR.

- These settings are retained even when the battery is removed, as long as the lithium battery is in place.

Advanced operations

29

Using the FADER function

- CCD-TR917/TR940 only

Selecting the fader function

You can fade in or out to give your recording a professional appearance. When the picture fades in, the sound gradually increases. When the picture fades out, the sound gradually decreases.

MONOTONE

When fading in, the picture gradually changes from black and white to color. When fading out, the picture gradually changes from color to black and white.

Advanced operations

31

Using the FADER function

Using the fader function

When fading in [a]

- (1) While the camcorder is in Standby mode, press FADER until the desired fade indicator flashes.
- (2) Press START/STOP to start recording. The fade indicator stops flashing.

When fading out [b]

- (1) During recording, press FADER until the desired fade indicator flashes.
- (2) Press START/STOP to stop recording. The fade indicator stops flashing, and then recording stops.

The fading mode selected last is indicated first of all.

Note on the bounce function

When you use the following functions, "BOUNCE" indicator does not appear.

- Wide mode
- Functions using the PICTURE EFFECT button
- Functions using the PROGRAM AE dial
- D ZOOM is set to ON in the menu system

To cancel the fader function

Before pressing START/STOP, press FADER until the indicator disappears.

When the date or time indicator and title are displayed

The date or time indicator and title do not fade in or fade out.

When the START/STOP MODE switch is set to SSEC or 1/2

You cannot use the fader function.

Note on the fader function

While using the bounce function, you cannot use the following functions.

- Exposure
- Focus
- Zoom

32

Using the wide mode function

Selecting the desired mode

You can record a cinematic picture (CINEMA) or a 16:9 wide picture to watch on the 16:9 wide-screen TV (16:9 FULL).

CINEMA

Black bands appear at the top and the bottom of the screen, and the viewfinder [a] and a normal TV screen [b] look wide. You can also watch the picture without black bands on a wide-screen TV [c].

16:9 FULL

The picture in the viewfinder [d] or on a normal TV [e] is horizontally compressed. You can watch the picture of normal images on a wide-screen TV [f].

34

Shooting in the dark (NightShot)

- CCD-TR917/TR940 only

The NightShot function enables you to shoot a subject in a dark place. You can achieve a satisfactory recording of the ecology of nocturnal animals for observation with this function.

This function may record picture nearly in monochrome.

- (1) While the camcorder is in Standby mode, slide NIGHTSHOT to ON.

- (2) Press START/STOP to start recording.

■ and "NIGHTSHOT" indicators flash.

To cancel the NightShot function

Slide NIGHTSHOT to OFF.

Using the N.S.light

When you set N.S.LIGHT to ON in the menu system, the picture will be more clear. The maximum limit of NightShot light is about 10 feet (about 3 m).

Notes on the NightShot

- When you keep setting NIGHTSHOT to ON in normal recording, picture may be recorded in incorrect/unnatural color.
- If focusing is difficult with the autofocus mode when using the NightShot function, use manual focus.
- You cannot use the built-in light and NIGHTSHOT function simultaneously. When you want to use either of them, turn off the other.

Advanced operations

33

Using the wide mode function

Using the wide mode function

You can select the wide mode (OFF, CINEMA, 16:9FULL) in the menu system (p. 26).

To cancel wide mode

Select OFF in the menu system.

To watch the tape recorded in wide mode

To watch the tape recorded in CINEMA mode, set the screen mode of the wide-screen TV to zoom mode. To watch the tape recorded in 16:9 FULL mode, set it to full mode. For details, refer to the instruction manual of your TV.

Note that the picture recorded in 16:9 FULL mode looks compressed on a normal TV.

Notes on wide mode

- If wide mode is set to 16:9FULL, the Steady Shot function does not work and the "S" indicator flashes (CCD-TR87/TR917/TR940 only).
- In wide mode, you cannot select the bounce function with FADER (CCD-TR917/TR940 only).
- When you record in 16:9 FULL mode, the date or time indicator will be widened on the wide-screen TV.
- If you dub a tape, the tape is copied in the same mode as the original recording.
- The wide mode is cancelled automatically 5 minutes after you remove the power source.
- When recording, you cannot change the mode.

Advanced operations

35

Using the PROGRAM AE function

Selecting the best mode

You can select one of six PROGRAM AE (Auto Exposure) modes to suit your shooting situation, referring to the following.

● Spotlight mode

For subjects in spotlight, such as at the theater or a formal event.

Ⓐ Soft Portrait mode

For zooming in on a still subject in telephoto mode, or for a subject behind an obstacle such as a screen. Creates a soft background for subjects such as people or flowers, and faithfully reproduces skin color.

Ⓜ Sports Lesson mode

For recording fast-moving subjects such as in tennis or golf games.

Ⓢ Beach & Ski mode

For people or faces in strong light or reflected light, such as at a beach in midsummer or on a ski slope.

☾ Sunset & Moon mode

For recording subjects in dark environments such as sunsets, fireworks, neon signs, or general night views.

Ⓐ Landscape mode

For distant subjects such as mountains or when recording a subject behind an obstacle such as a window or screen.

36

Focusing manually

– CCD-TR917/TR940 only

When to use manual focus

In the following cases you should obtain better results by adjusting the focus manually.

• Insufficient light [a]

• Subjects with little contrast - walls, sky, etc. [b]

• Too much brightness behind the subject [c]

• Horizontal stripes [d]

• Subjects through frosted glass

• Subjects beyond nets, etc.

• Bright subject or subject reflecting light

• Shooting a stationary subject when using a tripod

38

Using the PROGRAM AE function

Using the PROGRAM AE function

Turn the PROGRAM AE dial to select the desired PROGRAM AE mode.

To turn off program AE

Turn the PROGRAM AE dial to the ● position.

Notes on focus setting

• In the Spotlight, Sports lesson and Beach & Ski modes, you cannot take close-ups because the camcorder is set to focus only on subjects in the middle to far distance.

• In the Sunset & Moon and Landscape modes, the camcorder is set to focus only on distant subjects.

Advanced operations

Focusing manually

Focusing manually

When focusing manually, first focus in telephoto before recording, and then reset the shot length.

(1) Set FOCUS to MANUAL. The indicator appears in the viewfinder.

(2) Move the power zoom lever to the "T" side in the optical zoom zone until the lever reaches the end.

(3) Turn the NEAR/FAR dial to achieve a sharp focus.

(4) Set the desired shot length using the power zoom lever.

To return to autofocus mode

Set FOCUS to AUTO. The indicator in the viewfinder disappears.

Shooting in relatively dark places

Shoot at wide-angle after focusing in the telephoto position.

To record a very distant subject

Push FOCUS down to INFINITY. The lens focuses on the most distant subject while FOCUS is held down. When it is released, manual focus mode is resumed.

Use this function when shooting through a window or a screen, to focus on a most distant subject.

Note on manual focusing

The following indicators may appear:

⚠ when recording a very distant subject.

⚠ when the subject is too close to focus on.

Advanced operations

39

Enjoying picture effect

Selecting picture effect

You can make pictures like those of television with the Picture Effect function.

PASTEL [a]

The contrast of the picture is emphasized, and the picture looks like an animated cartoon.

NEG. ART [b]

The color and brightness of the picture is reversed.

SEPIA

The picture is sepia.

B&W

The picture is monochrome (black and white).

SOLARIZE [c]

The light intensity is more clear, and the picture looks like an illustration.

MOSAIC [d]

The picture is mosaic.

SLIM [e]

The picture expands vertically.

STRETCH [f]

The picture expands horizontally.

Enjoying picture effect

Using picture effect function

- (1) Press PICTURE EFFECT.
- (2) Turn the control dial to select the desired picture effect mode.

To turn off picture effect

Press PICTURE EFFECT. The indicator in the viewfinder goes out.

Note on the picture effect

When you turn the power off, the camcorder returns automatically to normal mode.

Adjusting the exposure

- CCD-TR917/TR940 only

When to adjust the exposure

Adjust the exposure manually under the following cases.

[a]

- The background is too bright (back lighting)
- Insufficient light: most of the picture is dark

[b]

- Bright subject and dark background
- To record the darkness faithfully

Adjusting the exposure

- (1) Press EXPOSURE.
- (2) Turn the control dial to adjust the brightness.

To return to automatic exposure mode

Press EXPOSURE again.

Adjusting the exposure

Shooting with the sun behind you

If the light source is behind your subject, or in the following situations, the subject will be recorded too dark.

- The subject is indoors and there is a window behind the subject.
- Bright light sources are included in the scene.
- When shooting a person wearing white or shiny clothes in front of a white background, the face will be recorded too dark.

Shooting in the dark

We recommend you to use the built-in light (CCD-TR67/TR87/TR917/TR940 only) or a video light (not supplied). To get the best color, you must maintain a sufficient light level.

When you adjust the exposure manually

- BACK LIGHT does not work.
- If you change the setting of PROGRAM AE mode, the camcorder automatically returns to automatic exposure mode.

Superimposing a title

You can select one of eight preset titles and two custom titles. You can also select the language, color, size and position of titles.

Superimposing titles

- (1) Press TITLE to display the title menu.
- (2) Turn the control dial to select $\square$, then press the dial.
- (3) Turn the control dial to select the desired title, then press the dial. The titles are displayed in the language you selected.
- (4) Turn the control dial to select the color, size, or position, then press the dial.
- (5) Turn the control dial to select the desired item, then press the dial.
- (6) Repeat step 4 and 5 until the title is arranged as desired.
- (7) Press control dial again to complete the setting.
- (8) When you want to stop recording the title, press TITLE.

Superimposing a title

To superimpose the title from beginning

After step 7, press START/STOP to start recording.

To superimpose the title while you are recording

After pressing START/STOP to start recording, start from step 1. In this case, beep is not heard.

To select the language of preset title

When you want to select the language, select $\square$ before step 2. Then select language and return to step 2.

To use the custom title

When you want to use the custom title, select $\square$ in step 2.

Notes on superimposing a title

- If you have not given any custom title, "-----" appears on the display.
- The FADER function works while the title is displayed, however, the title does not fade (CCD-TR917/TR940 only).
- If you display the menu or title menu while superimposing a title, the title is not recorded while the menu or title menu is being displayed.

Title color changes as follows :

WHITE $\leftrightarrow$ YELLOW $\leftrightarrow$ VIOLET $\leftrightarrow$ RED $\leftrightarrow$ CYAN $\leftrightarrow$ GREEN $\leftrightarrow$ BLUE

Title size changes as follows :

SMALL $\leftrightarrow$ LARGE

Title position changes as follows :

When you select the title size "SMALL", you can choose 9 positions. When you select the title size "LARGE" you can choose 8 positions.

Notes on the title

- Depending on size or position of the title, both of date and time or either of them is not displayed.
- If you input 13 characters or more for a LARGE title, the title is automatically reduced into a proper size after the position is set.

Advanced operations

44

Making your own titles

You can make up to two titles and store them in the camcorder. We recommend to set the power switch to VTR/PLAYER or eject the cassette before you begin. Your title can have up to 20 characters.

- (1) Press TITLE to display the title menu.
- (2) Turn the control dial to select $\square$, then press the dial.
- (3) Turn the control dial to select the first line (CUSTOM1) or second line (CUSTOM2), then press the dial.
- (4) Turn the control dial to select the column of the desired character, then press the dial.
- (5) Turn the control dial to select the desired character, then press the dial.
- (6) Repeat step 4 and 5 until you finish the title.
- (7) For finishing the titling work, turn the control dial to select SET, then press the dial.

Making your own titles

To edit a title you have stored

In step 3, select CUSTOM1 or CUSTOM2, depending on which title you want to edit, then change the title.

Note

You can not enter over 20 characters title.

If you take 5 minutes or longer to enter characters while a cassette is in the camcorder

The power goes off automatically. Characters you have entered remain. Turn STANDBY down once and then up again, then proceed from step 1.

To delete a title

In step 4, turn the control dial to select $\leftarrow$ then press the dial. The last character is erased. Repeat this step until all characters are deleted. Do not erase the title by selecting empty spaces. If you do so, a title full of empty spaces is stored.

Advanced operations

Recording with the date/time

Before you start recording or during recording, press DATE or TIME. You can record the date or time displayed in the viewfinder with the picture. Press DATE (or TIME), then press TIME (or DATE) to display the date and time together. The clock is set to East Coast Standard time at the factory. You can reset the clock in the menu system.

To stop recording with the date and/or time

Press DATE and/or TIME again. The date and/or time indicator disappears. The recording continues.

46

47

Optimizing the recording condition

Use this feature to check the tape condition before recording, so that you can get the best possible picture (ORC).

- (1) While the camcorder is in Standby mode, press MENU to display the menu.
- (2) Turn the control dial to select , then press the dial.
- (3) Turn the control dial to select ORC TO SET, then press the dial. "START/STOP KEY" flashes.
- (4) Press START/STOP.

The camcorder takes about 10 seconds to check the tape condition and then returns to Standby mode.

Each time you insert the cassette

Perform the above procedures.

Notes on the ORC function

- When you set ORC TO SET, the recording on the tape is erased for about 0.1 second so that the camcorder can check the tape condition. Be careful when you use a recorded tape. The 0.1 second blank is erased if you record from the point where you set ORC TO SET for more than 2 seconds, or if you record over the blank.
- You cannot use this function on a tape with the red mark on the cassette exposed.

Using the built-in light

– CCD-TR67/TR87/TR917/TR940 only

You can use the built-in light to suit your shooting situation. The recommended distance between the subject and camcorder is about 5 feet (1.5 meters).

While the camcorder is in Standby mode, slide LIGHT to ON. The built-in light turns on.

The built-in light turns on/off by turning on/off STANDBY.

To stop using the built-in light

Slide LIGHT to OFF.

To turn on the built-in light automatically

Slide LIGHT to AUTO.

The built-in light automatically turns on and off according to the ambient brightness. However, if the built-in light turns on for more than about 5 minutes, it automatically turns off. In this case, turn STANDBY down once and turn it up again.

Notes

- The battery pack is quickly discharging while the built-in light is turned on. Slide LIGHT to OFF when not in use.
- When you do not use the camcorder, slide LIGHT to OFF and remove the battery pack to avoid turning on the built-in light.
- When flickering occurs when you shoot white and bright subjects in AUTO mode, slide LIGHT to ON.
- The built-in light may turn on/off when you use the PROGRAM AE or BACK LIGHT function.
- When inserting or ejecting a cassette, the built-in light may be turned off.

CAUTION

Be careful not to touch the lighting section, because the plastic window and surrounding surfaces are hot while the light is on. It remains hot for a while after the light is turned off.

DANGER

Not to be handled by children.

Emits intense heat and light.

Use with caution to reduce the risk of fire or injury to persons.

Do not direct light at persons or materials from less than 4 feet (1.22 meters) during use and until cool.

Slide LIGHT to OFF when not in use.

Advanced operations

48

Using the built-in light

Replacing the bulb

Use the Sony XB-3D halogen lamp (not supplied). The supplied halogen lamp is not on the market. Purchase the Sony XB-3D halogen lamp.

Remove the power source before replacing the bulb.

- (1) While pushing the hole under the built-in light unit using a wire, remove the unit.
- (2) Turn the bulb housing counterclockwise and detach from the built-in light unit.
- (3) Replace the bulb using a dry cloth.
- (4) Attach the bulb housing turning it clockwise, then replace the built-in light unit.

CAUTION

- When replacing the bulb, use only the Sony XB-3D halogen lamp (not supplied) to reduce the risk of fire.
- To prevent possible burn hazard, disconnect the power source before replacing and do not touch the bulb until the bulb becomes cool enough to handle (for about 30 minutes or more).

Note

To prevent the bulb from being smudged with finger prints, handle it with a dry cloth, etc. If the bulb is smudged, wipe it completely.

Releasing the STEADY SHOT function

– CCD-TR87/TR917/TR940 only

When the Steady Shot function is working, the camcorder compensates for camera-shake.

You can release the Steady Shot function when you do not need to use the Steady Shot function. The indicator lights up when you release the Steady Shot function. Do not use the Steady Shot function when shooting a stationary object with a tripod. You can select ON or OFF in the menu system (p. 26).

To activate the Steady Shot function again

Set STEADYSHOT to ON in the menu system.

Notes on the Steady Shot function

- The Steady Shot function will not correct excessive camera-shake.
- When you set the STEADYSHOT function on or off in the menu system, the exposure may fluctuate.
- Steady Shot does not operate in 16:9 FULL mode. If you set STEADYSHOT to ON in the menu system, the indicator flashes.

Advanced operations

49

Editing onto another tape

You can create your own video program by editing with any other 8 mm, Hi8, Hi8 VHS, S-VHS, S-VHS, VHS, VHS, S-VHSC, ED Betamax or ED Betamax VCR that has video/audio inputs.

Before editing

Connect the camcorder to the VCR using the supplied A/V connecting cable. Set the input selector on the VCR to LINE, if available. Set EDIT to ON in the menu system (p. 26).

Starting editing

- (1) Insert a blank tape (or a tape you want to record over) into the VCR, and insert your recorded tape into the camcorder.
- (2) Play back the recorded tape on the camcorder until you locate slightly before the point where you want to start editing, then press **II** to set the camcorder in playback pause mode.
- (3) On the VCR, locate the recording start point and set the VCR in recording pause mode.
- (4) Press **II** on the camcorder and then press **II** of the VCR after 2, 3 seconds to start editing.

To edit more scenes

Repeat steps 2 to 4.

To superimpose the title while you are editing

You can superimpose the title while you are editing. Refer to "Superimpose a title" (p. 44).

To stop editing

Press **■** on both the camcorder and the VCR.

Note on the DISPLAY function

– CCD-TR67/TR87/TR917/TR940 only
If you have displayed the viewfinder screen indicators on the TV, erase the indicators by pressing DISPLAY on the Remote Commander so that they will not be superimposed on the edited tape.

Note on Fine Synchro Edit

If you connect a video deck that has the Fine Synchro Edit feature to the LANC jack of the camcorder, using a LANC cable (not supplied), the edit will be even more precise.

Recording from a VCR or TV

–CCD-TR917/TR940 only

You can record a tape from another VCR or a TV program from a TV that has video/audio outputs. Connect the camcorder to the VCR or TV using the supplied A/V cable.

- (1) While pressing the small green button on the POWER switch, set it to VTR.
- (2) Press **●** REC and the button on the right together on the camcorder at the point where you want to start recording.

In recording and recording pause mode, S video and VIDEO/AUDIO jacks automatically work as input jacks.

If your VCR or TV has an S video jack, connect using the S video connecting cable (not supplied) [a] to obtain a high quality picture.

If your VCR or TV is a monaural type, connect only the white plug for audio on both the camcorder and the VCR or TV.

If your VCR or TV does not have an S VIDEO OUT jack, connect cable [b]. Do not connect the S video connecting cable (not supplied) [a] to the camcorder.

To check the picture from a VCR or TV before recording

Press **II** after pressing **●**. You can check the picture in the viewfinder.

To stop recording

Press **■**.

Note on recording

You cannot record a picture that has a copyright control signal for copyright protection of software. "COPY INHIBIT" appears if you try to record such a picture.

Additional information

Changing the lithium battery in the camcorder

Your camcorder is supplied with a lithium battery installed. When the battery becomes weak or dead, the **⚡** indicator flashes in the viewfinder for about 5 seconds when you set the POWER switch to CAMERA. In this case, replace the battery with a Sony CR2025 or Duracell DL-2025 lithium battery. Use of any other battery may present a risk of fire or explosion. Discard used batteries according to the manufacturer's instructions.

The lithium battery for the camcorder lasts for about 1 year under normal operation. (The lithium battery that comes installed at the factory may not last 1 year.)

Notes on lithium battery

- Keep the lithium battery out of the reach of children.
- Should the battery be swallowed, immediately consult a doctor.
- Wipe the battery with a dry cloth to assure a good contact.
- Do not hold the battery with metallic tweezers, otherwise a short-circuit may occur.
- Note that the lithium battery has a positive (+) and a negative (-) terminals as illustrated. Be sure to install the lithium battery so that terminals on the battery match the terminals on the camcorder.

WARNING

The battery may explode if mistreated. Do not recharge, disassemble, or dispose of in fire.

Changing the lithium battery in the camcorder

Changing the lithium battery

When replacing the lithium battery, keep the battery pack or other power source attached. Otherwise, you will need to reset the date, time and other items in the menu system retained by the lithium battery.

- (1) Open the lid of the lithium battery compartment.
- (2) Push the lithium battery down once and pull it out from the holder.
- (3) Install the lithium battery with the positive (+) side facing out. Close the lid.

Resetting the date and time

You can reset the dand time in the menu system.

- (1) While the camcorder is in Standby mode, press MENU to display the menu.
- (2) Turn the control dial to select , then press the dial.
- (3) Turn the control dial to select CLOCK SET, then press the dial.
- (4) Turn the control dial to adjust the desired year, then press the dial.
- (5) Set the month, day, hour and minute by turning the control dial and pressing the dial.
- (6) Press MENU to erase the menu display.

- (6)** Press MENU to erase the menu display.

Repeat the above procedure.

Press DATE to display the date indicator.

When you press the same button again, the indicator goes off.

The year changes as follows.

↑

The internal clock of this camcorder operates on a 12-hour cycle.

- 12:00 AM stands for midnight.
- 12:00 PM stands for noon.

Simple setting of clock by time difference

- (1) While the camcorder is the standby mode, press MENU to display the menu.
- (2) Turn the control dial to select **EOTC**, then press the dial.
- (3) Turn the control dial to select **WORLD TIME**, then press the dial.
- (4) Turn the control dial to set a time difference, and press the dial. The hour of clock changes in relation to a time difference which you set.
- (5) Press MENU to erase the menu display.

- (5)** Press **MENU** to erase the menu display.

NOTE ON WORLD TIME
If the time is not set, WORLD TIME does not work.

Additional information

Usable cassettes and playback modes

Selecting cassette types

This Hi8 system is an extension of the standard 8 mm system, and was developed to realize higher picture quality.

You can use either Hi8 or standard 8 mm video cassette for this camera. When you use a Hi8 video cassette, the recording is made in the Hi8 system. When you use a standard 8 mm video cassette, the recording is made in the standard 8 mm system. Standard 8 mm video cassette is incapable of recording in the Hi8 system.

If you intend to use a standard 8 mm video recorder/player to play back a video tape, you are required to use a standard 8 mm video cassette for recording.

"XR," that is an abbreviation of "Extended Resolution", represents the new type of 8 mm camcorder that has the property to realize more quality picture compared with the conventional camcorders including the Hi8 models. You can record and play back pictures more clearly in detail with the "XR" camcorder. Video tape recorded by a camcorder having the "XR" function shows excellent picture quality at maximum when it is played back by the "XR" camcorder. When video tape recorded by this "XR" camcorder is played back by a conventional 8/Hi8 camcorder or when video tape recorded by a conventional 8/Hi8 camcorder is played back by this "XR" camcorder, the playback picture quality is in the normal quality of the 8/Hi8 camcorder.

When you play back

Note on AFM HiFi stereo

- You record the tape using this camcorder, then play it back on an AFM HiFi monaural video recorder/player.
- You record the tape on an AFM HiFi monaural video recorder, then play it back on this camcorder.

Because the TV color systems differ from country to country, you may not be able to play back foreign pre-recorded tapes. Refer to the list of "Using your camcorder abroad" to check the TV color system of foreign countries.

Tips for using the battery pack

Preparing the battery pack

Always carry additional batteries
Have sufficient battery pack power to do 2 to 3 times as much recording as you have planned.

Battery life is shorter in a cold environment
Battery efficiency is decreased, and the battery will be used up more quickly, if you are recording in a cold environment.

Turn **STANDBY** down when not recording to save battery power. A smooth transition between scenes can be made even if recording is stopped and started again. While you are positioning the subject, selecting an angle, or looking through the viewfinder lens, the lens moves automatically and the battery is used. The battery is also used when a tape is inserted or removed.

When to replace the battery pack

While you are using your camcorder, the remaining battery indicator decreases gradually as battery power is used up. Remaining time in minutes appears.

When the remaining battery indicator reaches the lowest point, the  indicator may appear and start flashing in the viewfinder.

When the  indicator changes from slow flashing to rapid flashing while you are recording, set the POWER switch to OFF on the camcorder and replace the battery pack. Leave the tape in the camcorder to obtain a smooth transition between scenes after the battery pack has been replaced.

Additional information

Tips for using the battery pack

Notes on the rechargeable battery pack

Caution

Never leave the battery pack in temperatures above 140°F (60°C), such as in a car parked in the sun or under direct sunlight.

The battery pack heats up

During charging or recording, the battery pack heats up. This is caused by energy that has been generated and a chemical change that has occurred inside the battery pack. This is not cause for concern and is normal.

Be sure to observe the following

- Keep the battery pack away from fire.
- Keep the battery pack dry.
- Do not open nor try to disassemble the battery pack.
- Do not expose the battery pack to any mechanical shock.

The life of the battery pack

If the battery indicator flashes rapidly just after turning on the camcorder with a fully charged battery pack, the battery pack should be replaced with a new fully charged one.

Charging temperature

You should charge batteries at temperatures from 50°F to 86°F (from 10°C to 30°C). Lower temperatures require a longer charging time.

Tips for using the battery pack

Notes on the "InfoLITHIUM" battery pack

What is "InfoLITHIUM"

The "InfoLITHIUM" is a lithium ion battery pack which can exchange data with compatible video equipment about its battery consumption. Sony recommends that you use the "InfoLITHIUM" battery pack with video equipment having the  mark.

When you use this battery pack with video equipment having the  mark, the video equipment will indicate the remaining battery time in minutes*. However, if you use it with video equipment not having this mark, the remaining battery capacity will not be indicated in minutes.

*"InfoLITHIUM" is a trademark of Sony Corporation.

* The indication may not be accurate depending on the condition and environment which the equipment is used under.

How the battery consumption is displayed

The power consumption of the camcorder changes depending on its use, such as how the autofocus is working.

While checking the condition of the camcorder, the "InfoLITHIUM" battery pack measures the battery consumption and calculates the remaining battery power. If the condition changed drastically, the remaining battery indication may suddenly decrease or increase by more than 2 minutes.

Even if 5 to 10 minutes is indicated as the battery remaining time in the viewfinder, the  indicator may also flash under some condition.

To obtain more accurate remaining battery indication

Set the camcorder to recording standby mode and point towards a stationary object. Do not move the camcorder for 30 seconds or more.

- If the indication seems incorrect, recharge the battery pack fully (Full charge¹⁾). Note that if you have used the battery in a hot or cold environment for long time, or you have repeated charging many times, the battery pack may not be able to show the correct time even after being fully charged.
- After you have used the "InfoLITHIUM" battery pack with an equipment not having the  mark, make sure that you use up the battery pack on the equipment having the  mark and then recharge fully.

Why the remaining battery indication does not match the continuous recording time in the operating instructions

The recording time is affected by the environmental temperature and conditions. The recording time becomes very short in a cold environment. The continuous recording time in the operating instructions is measured under the condition of using a fully charged (or normal charged) battery pack in 77°F (25°C). As the environmental temperature and condition are different when you actually use the camcorder, the remaining battery time is not same as the continuous recording time in the operating instructions.

¹⁾ Full charge: Charging until FULL appears in the display window.

Additional information

Maintenance information and precautions

Notes on the battery case

~ CCD-TR67/TR87/TR940 only

- Use only with alkaline batteries. You cannot use the battery case with manganese batteries or size AA (LR6) rechargeable NiCd batteries.
- Using with Sony alkaline batteries is preferable.
- Battery life is remarkably shorter in a cold environment (lower than 50°F/10°C).
- Keep the metal part clean. If it gets dirty, wipe it with a soft cloth.
- Do not disassemble or convert the battery case.
- Do not expose the battery case to any mechanical shock.
- During recording, the battery case heats up. This is not cause for concern.
- Prevent the electrode in the battery case from coming in contact with a metal object.
- If you will not use the battery case for a long time, detach the battery case from the camcorder and remove the batteries from the battery case.

Moisture condensation

If the camcorder is brought directly from a cold place to a warm place, moisture may condense inside the camcorder, on the surface of the tape, or on the lens. In this condition, the tape may stick to the head drum and be damaged or the unit may not operate correctly. To prevent possible damage under these circumstances, the camcorder is furnished with moisture sensors. Please, take the following precautions.

Inside the camcorder

If there is moisture inside the camcorder, the beep sounds and the  indicator flashes. If this happens, none of the functions except cassette ejection will work. Open the cassette compartment, turn off the camcorder, and leave it about 1 hour. When  indicator flashes at the same time, the cassette is inserted in the camcorder. Eject the cassette, turn off the camcorder, and leave also the cassette about 1 hour. The camcorder can be used again if the  indicator does not appear when the power is turned on again.

On the lens

If moisture condenses on the lens, no indicator appears, but the picture becomes dim. Turn off the power and do not use the camcorder for about 1 hour.

How to prevent moisture condensation

When bringing the camcorder from a cold place to a warm place, put the camcorder in a plastic bag and allow it to adapt to room conditions over a period of time.

- (1) Be sure to tightly seal the plastic bag containing the camcorder.
- (2) Remove the bag when the air temperature inside it has reached the temperature surrounding it (after about 1 hour).

Maintenance information and precautions

Video head cleaning

To ensure normal recording and clear pictures, clean the video heads. When the  indicator and "CLEANING CASSETTE" message appear one after another or playback pictures are "noisy" or hardly visible, the video heads may be dirty.

- [a] Slightly dirty
[b] Very dirty

If this happens, clean the video heads with the Sony V8-25CLH/V8-25CLD cleaning cassette (not supplied). After checking the picture, if it is still "noisy," repeat the cleaning. (Do not repeat cleaning more than 5 times in one session.)

Caution

Do not use a commercially available wet-type cleaning cassette. It may damage the video heads.

Note

If the Sony V8-25CLH/V8-25CLD cleaning cassette is not available in your area, consult your nearest Sony dealer.

Precautions

Camcorder operation

- Operate the camcorder on 7.2 V (battery pack) or 8.4 V (AC power adaptor).
- For DC or AC operation, use the accessories recommended in this manual.
- Should any solid object or liquid get inside the casing, unplug the camcorder and have it checked by a Sony dealer before operating it any further.
- Avoid rough handling or mechanical shock. Be particularly careful of the lens.
- Keep the POWER switch setting to OFF when not using the camcorder.
- Do not wrap up the camcorder and operate it since heat may build up internally.
- Keep the camcorder away from strong magnetic fields or mechanical vibration.

Built-in light

~CCD-TR67/TR87/TR917/TR940 only

- Do not knock or jolt the built-in light while it is turned on as it may damage the bulb or shorten the life of the bulb.
- Do not leave the built-in light on while it is resting on or against something; it may cause a fire or damage the built-in light.

Additional information

Maintenance information and precautions

On handling tapes

Do not insert anything in the small holes on the rear of the cassette. These holes are used to sense the type of tape, thickness of tape and if the recording tab is in or out.

Camcorder care

- When the camcorder is not to be used for a long time, remove the tape. Periodically turn on the power, operate the camera and player sections and play back a tape for about 3 minutes.
- Clean the lens with a soft brush to remove dust. If there are fingerprints on it, remove them with a soft cloth.
- Clean the camcorder body with a dry soft cloth, or a soft cloth lightly moistened with a mild detergent solution. Do not use any type of solvent which may damage the finish.
- Do not let sand get into the camcorder. When you use the camcorder on a sandy beach or in a dusty place, protect it from the sand or dust. Sand or dust may cause the unit to malfunction, and sometimes this malfunction cannot be repaired.

AC power adaptor

- Unplug the unit from the wall outlet when not in use for a long time. To disconnect the power cord, pull it out by the plug. Never pull the power cord itself.
- Do not operate the unit with a damaged cord or if the unit has been dropped or damaged.
- Do not bend the power cord forcibly, or put a heavy object on it. This will damage the cord and may cause a fire or electrical shock.
- Be sure that nothing metallic comes into contact with the metal parts of the connecting plate. If this happens, a short may occur and the unit may be damaged.
- Always keep the metal contacts clean.
- Do not disassemble the unit.
- Do not apply mechanical shock or drop the unit.
- While the unit is in use, particularly during charging, keep it away from AM receivers and video equipment because it will disturb AM reception and video operation.
- The unit becomes warm while in use. This is normal.
- Do not place the unit in locations that are:
 - Extremely hot or cold
 - Dusty or dirty
 - Very humid
 - Vibrating

Notes on dry batteries

- To avoid possible damage from battery leakage or corrosion, observe the following.
 - Be sure to insert the batteries in the correct direction.
 - Dry batteries are not rechargeable.
 - Do not use a combination of new and old batteries.
 - Do not use different types of batteries.
 - The batteries slowly discharge while not in use.
 - Do not use a battery that is leaking.

If battery leakage occurred

- Wipe off the liquid in the battery case carefully before replacing the batteries.
- If you touch the liquid, wash it off with water.
- If the liquid get into your eyes, wash your eyes with a lot of water and then consult a doctor.

If any difficulty should arise, unplug the unit and contact your nearest Sony dealer.

64

Using your camcorder abroad

Each country or area has its own electric and TV color systems. Before using your camcorder abroad, check the following points.

Power sources

You can use your camcorder in any country or area with the supplied AC power adaptor within 100 V to 240 V AC, 50/60 Hz. Use a commercially available AC plug adaptor [a], if necessary, depending on the design of the wall outlet [b].

Difference in color systems

This camcorder is an NTSC system based camcorder. If you want to view the playback picture on a TV, it must be an NTSC system based TV. Check the following list.

NTSC system

Bahama Islands, Bolivia, Canada, Central America, Chile, Colombia, Ecuador, Jamaica, Japan, Korea, Mexico, Peru, Surinam, Taiwan, the Philippines, the U.S.A., Venezuela, etc.

PAL system

Australia, Austria, Belgium, China, Czech Republic, Denmark, Finland, Germany, Great Britain, Holland, Hong Kong, Italy, Kuwait, Malaysia, New Zealand, Norway, Portugal, Singapore, Slovak Republic, Spain, Sweden, Switzerland, Thailand, etc.

PAL-M system

Brazil

PAL-N system

Argentina, Paraguay, Uruguay

SECAM system

Bulgaria, France, Guyana, Hungary, Iran, Iraq, Monaco, Poland, Russia, Ukraine, etc.

Additional information

Self-diagnosis display

The camcorder has a self-diagnosis display. This function displays the camcorder's condition with five digits (a combination of a letter and figures) in the viewfinder or in the display. If this occurs, check the following code chart. The five-digit display informs you of the camcorder's current condition. The last two digits (indicated by □□) will differ depending on the state of the camcorder.

Viewfinder

Self-diagnosis display

- C□□□□
You can service the camcorder yourself.
- E□□□□
Contact your Sony dealer or local authorized Sony facility.

Additional information

Five-digit display	Cause and/or Corrective Actions
C21:□□	• Moisture condensation has occurred. → Remove the cassette and leave the camcorder for at least 1 hour. (p. 62)
C22:□□	• The video heads are dirty. → Clean the heads using the Sony V8-25CLH/V8-25CLD cleaning cassette (not supplied). (p. 63)
C23:□□	• You are using a battery pack that is not an "InfoLITHIUM" battery pack. → Use an "InfoLITHIUM" battery pack. (p. 61)
C31:□□ C32:□□	• A serviceable situation not malfunctioned above has occurred. → Remove the cassette and insert it again, then operate the camcorder. → Disconnect the power cord of the AC power adaptor or remove the battery pack. After reconnecting the power source, operate the camcorder.
E61:□□ E62:□□	• A camcorder malfunction which you cannot service has occurred. → Contact your Sony dealer or local authorized Sony service facility and inform them of the five digits. (example: E61:10)

If you are unable to resolve the problem, contact your Sony dealer or local authorized Sony service facility.

Notes on the Remote Commander

- Keep the remote sensor away from strong light sources such as direct sunlight or illumination. Otherwise, the remote control may not be effective.
- Be sure that there is no obstacle between the remote sensor on the camcorder and the Remote Commander.
- This camcorder works in commander mode VTR 2. The commander modes (1, 2 and 3) are used to distinguish this camcorder from other Sony VCRs to avoid remote control misoperation. If you use another Sony VCR in commander mode VTR 2, we recommend you change the commander mode or cover the remote sensor of the VCR with black paper.

To prepare the Remote Commander

Insert two size AA (R6) batteries by matching the + and – on the batteries to the diagram inside the battery compartment.

75

76

Identifying the parts

Note on battery life

The batteries for the Remote Commander last about 6 months under normal operation. When the batteries become weak or dead, the Remote Commander does not work.

To avoid damage from possible battery leakage

Remove the batteries when you will not use the Remote Commander for a long time.

Attaching the shoulder strap

Attach the supplied shoulder strap to the hooks for the shoulder strap.

Additional information

To watch the demonstration

You can start the demonstration by setting DEMO MODE in the menu system.

You can also start the demonstration by the following operation.

When NIGHTSHOT is set to ON, you cannot watch the demonstration (CCD-TR917/TR940 only).

To enter demo mode

(1) Eject the cassette and set the POWER switch to VTR/PLAYER.

(2) Turn STANDBY up to STANDBY.

(3) While holding down set the POWER switch to CAMERA.

To exit demo mode

(1) Set the POWER switch to VTR/PLAYER.

(2) Turn STANDBY up to STANDBY.

(3) While holding down set the POWER switch to CAMERA.

SECTION 4 PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS

4-1. FRAME SCHEMATIC DIAGRAM

4-2. PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS

THIS NOTE IS COMMON FOR PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS.
(In addition to this, the necessary note is printed in each block.)

• For printed wiring boards.

-  : Pattern from the side which enable seeing.
(The other layer's patterns are not indicated.)
- Circled numbers refer to waveforms.
- Through hole is omitted.
- There are few cases that the part printed on diagram isn't mounted in this model.
- Chip parts.

Transistor

Diode

• For schematic diagrams.

- All capacitors are in μF unless otherwise noted. pF : μF .
50 V or less are not indicated except for electrolytics and tantalums.
- Chip resistor are 1/16W unless otherwise noted.
 $\text{k}\Omega$: 1000 Ω , $\text{M}\Omega$: 1000 $\text{k}\Omega$.
- Caution when replacing chip parts.
New parts must be attached after removal of chip.
Be careful not to heat the minus side of tantalum capacitor, because it is damaged by the heat.

- Some chip part will be indicated as follows.

Example

C541

L452

22U

10UH

TA A

2520

Kinds of capacitor

Temperature characteristics

External dimensions (mm)

- Constants of resistors, capacitors, ICs and etc with XX indicate that they are not used. In such cases, the unused circuits may be indicated.
- Parts with $\star$ differ according to the model/destination. Refer to the mount table for each function.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- Signal name
XEDIT $\rightarrow$ EDIT PB/XREC $\rightarrow$ PB/REC
-  : non flammable resistor.
-  : fusible resistor.
-  : panel designation.
-  : B+ Line
-  : B- Line
-  : IN/OUT direction of (+, -) B LINE.
-  : adjustment for repair.
- Circled numbers refer to waveforms.

The components identified by mark Δ or dotted line with mark Δ are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque Δ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

When indicating parts by reference number, please include the board name.

• Measuring conditions voltage value and waveform.

- The object is color bar chart of pattern box.
- Voltages and dc between ground and measurement points. Readings are taken with a digital multimeter (DC 10M Ω).
- Voltages variations may be noted due to normal production tolerances.

1.Connection

2. Adjust the distance so that the output waveform of Fig. a and the Fig. b can be obtain.

Fig. a (Video output terminal output waveform)

Fig. b (Picture on monitor TV)

CD-181 BOARD CAMERA REC

Note on the CCD imager replacement

- The CCD imager is not mounted for the already mounted CD-181 board supplied as the repair parts.
When replacing the CD-181 board, remove the CCD imager from the old board and install on the new board.
- Perform all adjustments of the camera block when the CCD imager has been replaced.
- Handle the CCD imager with attention such as MOS IC as it may be broken by static electricity in the structure.
Also, prevent the receiving light section from dust attached and strong light.

• For Printed Wiring Boards.

There are few cases that the part isn't mounted in this model is printed on this diagram.

• Chip transistor

Note:
The components identified by mark  or dotted line with mark  are critical for safety. Replace only with part number specified.

Note:
Les composants identifiés par une marque  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

• For Printed Wiring Boards.

- This board is four-layer print board. However, the patterns of layers 2 to 3 have not been included in the diagram.

There are few cases that the part isn't mounted in this model is printed on this diagram.

• Chip transistor

J-5	Adjusting remote commander (RM-95-remodeled partly) Note 1	J-6082-053-B	
J-6	Siemens star	J-6080-875-A	For checking the flange back
J-7	CPC-7 jig	J-6082-382-A	For the color viewfinder adjustment For adjusting the video section
J-8	Power code Note 2	J-6082-223-A	For connecting the battery terminal and DC power supply
J-9	AFM DEV jig	J-6082-312-A	For adjusting the deviation
J-10	Clear chart	J-6080-621-A	
J-11	Extension cable (16P, 0.5 mm)	J-6082-357-A	For extension between the CD-181 board (CN401) and VC-195 board (CN501)
J-12	IR receiver jig	J-6082-383-A	For adjusting the IR transmitter
J-13	Extension cable (48P, 0.8 mm)	J-6082-188-A	For extension between the DD-105 board (CN931) and VC-195 board (CN914)

Note 1: If the micro processor IC in the adjusting remote commander is not the new micro processor (UPD7503G-C56-12), the pages cannot be switched. In this case, replace with the new micro processor (8-759-148-35).

Note 2: Connect the adjusting remote commander to the LANC jack, and set the HOLD switch to the "ADJ" side.

Fig. 5-1-1.

5-1. CAMERA SECTION ADJUSTMENT

1-1-2. Preparations

Note 1: For details of how remove the cabinet and boards, refer to "2. DISASSEMBLY".

Note 2: When performing only the adjustments, the lens block and boards need not be disassembled.

- 1) Connect the equipment for adjustments according to Fig. 5-1-3.
- 2) By setting the "Forced Camera Power ON mode", the camera power can be turned ON even if the front panel block (MA-311 board, power switch, microphone unit) has been removed. When removing the front panel block disconnect the following connector.

1. VC-195 board CN903 (23P 0.5mm)

- 3) Video light (Video light model) need not be assembled. If removing it, disconnect the following connector.

1. VC-195 board CN909 (10P, 0.5mm)

Note 3: As removing the cabinet (R) (removing the VC-195 board CN911) means removing the lithium 3V power supply (CF-49 board), data such as date, time, user-set menus will be lost. After completing adjustments, reset these data. If the cabinet (R) has been removed, the self-diagnosis data, data on history of use (total drum rotation time etc.) will be lost. Before removing, note down the self-diagnosis data and data on the history use. (Refer to the "Service Mode" of "VIDEO SECTION ADJUSTMENT" for the data on the history use.)

Note 4: Setting the "Forced Camera Power ON" Mode

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 10, set data: 01, and press the PAUSE button of the adjusting remote commander.

The above procedure will enable the camera power to be turned on with the front panel block removed. After completing adjustments, be sure to exit the "Forced Camera Power ON Mode".

Note 5: Exiting the "Forced Camera Power ON" Mode

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 10, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: 0, address: 01, and set data: 00.

Fig. 5-1-2.

Fig. 5-1-3.

1-1-3. Precaution

1. Setting the Switch

Unless otherwise specified, set the switches as follows and perform adjustments without loading cassette.

- | | | | |
|--|-------------------------|--|-----------------------------|
| 1. POWER switch (MA-311 board) | CAMERA | 6. STEADY SHOT (Menu display) | OFF |
| 2. NIGHT SHOT switch (Lens block) | OFF (Night shot model) | 7. FOCUS switch (MF-8500) | MANUAL (Manual focus model) |
| 3. VIDEO LIGHT switch (MA-311 board) | OFF (Video light model) | 8. PROGRAM AE (CF-49 board) | Auto |
| 4. DEMO MODE (Menu display) | OFF | 9. BACK LIGHT (CF-49 board) | OFF |
| 5. DIGITAL ZOOM (Menu display) | OFF | 10. PICTURE EFFECT (CF-49 board) | OFF |
| | | 11. 16 : 9 WIDE (MENU display) | OFF |

2. Adjusting Procedure

Adjust in the given order.

Fig. 5-1-4.

3. Subject

- 1) Color bar chart (Standard picture frame)
Adjust the picture frame as shown in Fig. 5-1-4. if adjustments are performed using the color bar chart. (Standard picture frame)
- 2) White pattern (Standard picture frame)
Remove the color bar chart from the pattern box, and insert a clear chart in its place. (Do not perform zoom operations during this time.)
- 3) Chart for flange back adjustment
Combine a white A0 size (1189 mm x 841 mm) paper to a black one, and make the chart shown in Fig. 5-1-5.

Fig. 5-1-5.

Note : Use the non-reflecting and non-glazing vellum paper whose size is more than A0, and make the boundary between white and black to be smoothly flat.

1-1-4. Adjusting Remote Commander

The adjusting remote commander is used for changing the calculation coefficient in signal processing, EVR data, etc. The adjusting remote commander performs bi-directional communication with the unit using the remote commander signal line (LANC). The resultant data of this bi-directional communication is written in the non-volatile memory.

1. Using the adjusting remote commander

- 1) Connect the adjusting remote commander to the LANC terminal.
- 2) Adjust the HOLD switch of the adjusting remote commander to "HOLD" (SERVICE position).

If it has been properly connected, the LCD on the adjusting remote commander will display as shown in Fig. 5-1-6.

Fig. 5-1-6.

- 3) Operate the adjusting remote commander as follows.

- Changing the page

The page increases when the EDIT SEARCH+ button is pressed, and decreases when the EDIT SEARCH- button is pressed. There are altogether 16 pages, from 0 to F.

Hexadecimal notation	0	1	2	3	4	5	6	7	8	9	A	B	C	D	E	F
LCD Display	0	1	2	3	4	5	6	7	8	9	A	b	c	d	E	F
Decimal notation conversion value	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

Table 5-1-1.

- Changing the address

The address increases when the FF (▶▶) button is pressed, and decreases when the REW (◀◀) button is pressed. There are altogether 256 addresses, from 00 to FF.

- Changing the data (Data setting)

The data increases when the PLAY (▶) button is pressed, and decreases when the STOP (■) button is pressed. There are altogether 256 data, from 00 to FF.

- Writing the adjustment data

The PAUSE button must be pressed to write the adjustment data (D, E, F page) in the nonvolatile memory.

(The new adjustment data will not be recorded in the nonvolatile memory if this step is not performed.)

- 4) Select page: 0, address: 01, and set the data to 01, and enables Page D and E, F to be adjusted.
- 5) After completing all adjustments, set data: 00 to page: 0, address: 01 and turn off the main power supply (8.4V) once.

2. Precautions upon using the adjusting remote commander

Mishandling of the adjusting remote commander may erase the correct adjustment data at times. To prevent this, it is recommended that all adjustment data be noted down before beginning adjustments and new adjustment data after each adjustment.

1-1-5. Data Processing

The calculation of the DDS display and the adjusting remote commander display data (hexadecimal notation) are required for obtaining the adjustment data of some adjustment items. In this case, after converting the hexadecimal notation to decimal notation,

calculate and convert the result to hexadecimal notation, and use it as the adjustment data. Table 5-1-2. indicates the hexadecimal notation-the decimal notation calculation table.

Hexadecimal notation-Decimal notation																	② ↓
The lower digits of the hexadecimal notation The upper digits of the hexadecimal notation	0	1	2	3	4	5	6	7	8	9	A (A)	B (b)	C (c)	D (d)	E (E)	F (F)

E (E)	224	225	226	227	228	229	230	231	232	233	234	235	236	237	238	239	
F (F)	240	241	242	243	244	245	246	247	248	249	250	251	252	253	254	255	

Note: () indicate the adjusting remote commander display.

(Example) In the case that the DDS display and the adjusting remote commander display are BD (bd).
As the upper digit of the hexadecimal notation is B (b), and the lower digit is D (d), the intersection “189” of the ① and ② in the above table is the decimal notation to be calculated.

Table 5-1-2.

1-2. INITIALIZATION OF D, E, F PAGE DATA

1. Initializing the D,E,F Page Data

Note 1: If “Initializing the D, E, F Page Data” is performed, all data of the D page, E page and F page will be initialized. (It is impossible to initialize a single page.)

Note 2: If the D,E,F page data has been initialized, „Modification of D, E, F Page Data“ and all adjustments need to be performed again.

Adjusting page	D
Adjusting Address	00 to 6F
Adjusting page	F
Adjusting Address	00 to FF
Adjusting page	E
Adjusting Address	00 to FF

Initializing Method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 2, address: 00, and set data: 55.
- 3) Select page: 2, address: 01, set data: 55, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: 2, address: 02, and check that the data is 01.
- 5) Select page: 3, address: 00, and set data: 29.
- 6) Select page: 3, address: 01, set data: 29, and press the PAUSE button of the adjusting remote commander.
- 7) Select page: 0, address: 01, and set data: 00.
- 8) Perform „Modification of D,E,F Page Data“.

2. Modification of D, E, F Page Data

If the D, E, F page data has been initialized, change the data of the “Fixed data-2” address shown in the following tables by manual input.

Modifying Method:

- 1) Before changing the data, select page: 0, address: 01, and set data: 01.
- 2) New data for changing are not shown in the tables because they are different in destination. When changing the data, copy the data built in the same model.

Note : If copy the data built in the different model, the camcorder may not operate.

- 3) When changing the data, press the PAUSE button of the adjusting remote commander each time when setting new data to write the data in the non-volatile memory.
- 4) Check that the data of adjustment addresses is the initial value. If not, change the data to the initial value.
- 5) After completing “Modification of D, E, F Page Data”, select page: 0, address: 01, and set data: 00. Also perform all adjustments.

3. D Page Table

Note1 :

Fixed data-1 : Initialized data.
(Refer to “1. Initializing the D,E,F Page Data”.)

Fixed data-2 : Modified data.
(Refer to “2. Modification of D, E, F Page Data”).

1-3. CAMERA SYSTEM ADJUSTMENTS

Before perform the camera system adjustments, Check that the specified value of “28MHz Origin Oscillation Adjustment”, “Y OUT level Adjustment” and “C OUT level Adjustment” of “VIDEO SYSTEM ADJUSTMENT” are satisfied.

1. G-CAM flip Adjustment

Set the color reproduction conditions to optimum.

Subject	Color bar chart standard picture frame
Measurement Point	Display data of page 1 of the adjusting remote commander (Note 1)
Measuring Instrument	
Adjustment Page	F
Adjustment Address	21

Note 1. Displayed data of page 1 of the adjusting remote commander.

1 : XX : XX
 → S2
 → S1

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 0, address: 03, and set data: 16.
- 3) Select page: F, address: 21, set data: D2, and press the PAUSE button of the adjusting remote commander.
- 4) Select page 1 of the adjusting remote commander, and compare the higher 2 digits (S1) and lower 2 digits (S2) of the 4-degits display data.

When $S1 < S2$

Perform steps 5) onwards.

When $S1 \geq S2$

Perform steps “Processing after Completing Adjustments”.

- 5) Select page: F, address: 21, set data: 52, and press the PAUSE button of the adjusting remote commander.

Processing after Completing Adjustments

- 1) Select page: 0, address: 03, and set data: 00.
- 2) Select page: 0, address: 01, and set data: 00.

2. HALL Adjustment

For detecting the position of the lens iris, adjust the hall AMP gain and offset.

Subject	Not required
Measurement Point	DDS display data of EVF or TV monitor (Note 3)
Measuring Instrument	
Adjustment Page	F
Adjustment Address	2F, 30
Specified Value	90 to 94 during IRIS OPEN (Note 1) 19 to 1D during IRIS CLOSE (Note 2)

Note 1: Select page: 2, address: 01, set data: 01, and press the PAUSE button of the adjusting remote commander.

Note 2: Select page: 2, address: 01, set data: 03, and press the PAUSE button of the adjusting remote commander.

Note 3: DDS display data of EVF or TV monitor.

00 00XX
 → Object data

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 0, address: 03, and set data: 03.
- 3) Select page: D, address: 11, set data: 02, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: 2, address: 01, set data: 03, and press the PAUSE button.
- 5) Select page: F, address: 30, set data: 80, and press the PAUSE button.
- 6) Select page: F, address: 2F, set data: 40, and press the PAUSE button.
- 7) Read the DDS display data (the bottom two digits of the display data at the bottom right of the EVF or the TV monitor), and this data is named K₂.
- 8) Select page: F, address: 2F, set data: 30, and press the PAUSE button.
- 9) Read the DDS display data, and this data is named K₁.
- 10) Select page: 2, address: 01, set data: 01, and press the PAUSE button.
- 11) Read the DDS display data, and this data is named W₁.
- 12) Select page: F, address: 2F, set data: 40, and press the PAUSE button.
- 13) Read the DDS display data, and this data is named W₂.
- 14) Convert W₁, W₂, K₁, K₂, to decimal notation, and obtain W₁' , W₂' , K₁' , K₂'. (Refer to Table 5-1-2. “Hexadecimal notation - decimal notation conversion table” of “Service mode”.)
- 15) Calculate X₁' using the following equations (decimal notation calculation).

$$A' = W_2' + K_1' - W_1' - K_2' \quad \text{Equation 1}$$

$$B' = W_1' - K_1' \quad \text{Equation 2}$$

$$X_1' = [1904 + (48 \times A') - (16 \times B')] / A' \quad \text{Equation 3}$$
- 16) Convert X₁' to hexadecimal notation, and obtain X₁.
(Round off to one decimal place)
- 17) Select page: F, address: 2F, set data: X₁, and press the PAUSE button.
- 18) Select page: 2, address: 01, and set data: 01, and press the PAUSE button.
- 19) Select page: F, address: 30, change the data and adjust the DDS display data to “92”.
- 20) Press the PAUSE button of the adjusting remote commander.
- 21) Select page: 2, address: 01, and set data: 03, and press the PAUSE button.

22) Read the DDS display data, and this data is named K_0 . If K_0 lies within the "19" to "1D" range, perform "Processing after completing adjustments". If it lies outside the range, perform the following adjustments.

23) Convert K_0 to decimal notation, and obtain K_0' .

24) Calculate X_2' using the following equations (decimal notation calculation).

$$C' = 146 - B' - K_0' \quad \text{Equation 4}$$

$$X_2' = [(119 - B') \times (X_1' - 48) + (48 \times C')] / C' \quad \text{Equation 5}$$

(X_1' and B' are values obtained from equations 2) and 3))

25) Convert X_2' to hexadecimal notation, and obtain X_2 .

(Round off to one decimal place)

26) Select page: F, address: 2F, set data: X_2 , and press the PAUSE button.

27) Select page: 2, address: 01, set data: 03, and press the PAUSE button.

28) Select page: F, address: 30, change the data and adjust the DDS display data to "1B".

29) Press the PAUSE button of the adjusting remote commander.

30) Select page: 2, address: 01, set data: 01, and press the PAUSE button.

31) Check the DDS display data lies within the "90" to "94" range.

Processing after Completing Adjustments

1) Select page: D, address: 11, and set data: 00, and press the PAUSE button.

2) Select page: 0, address: 01, and set data: 00.

3) Select page: 2, address: 01, and set data: 00, and press the PAUSE button.

4) Select page: 0, address: 03, and set data: 00.

3. Flange Back Adjustment

The inner focus lens flange back adjustment is carried out automatically. In whichever case, the focus will be deviated during auto focusing/manual focusing.

3-1. Flange Back Adjustment(1)

Subject	Flange back adjustment chart (2.0 m from the front of the lens) (Luminance: 200 ± 50 lux)
Measurement Point	Check operation on TV monitor
Measuring Instrument	
Adjustment Page	F
Adjustment Address	3E to 42, 76 to 7B

Switch setting:

1) NIGHT SHOT switch OFF

Adjusting method:

1) Check that at both the zoom lens TELE end and WIDE end, the center of the chart for the flange back adjustment and center of the exposure screen coincide.

2) Select page: 0, address: 01, and set data: 01.

3) Check that the data of page: F, address: 3E to 42, 76 to 7B is the initial value (See table below).

Address	Data	Address	Data
3E	25	77	54
3F	00	78	25
40	19	79	80
41	00	7A	10
42	35	7B	FF
76	1B		

4) Select page: 2, address: 02, and check that the data is "00".

5) Select page: 2, address: 01, set data: 13, and press the PAUSE button of the adjusting remote commander.

6) Select page: 2, address: 01, set data: 15, and press the PAUSE button of the adjusting remote commander.

(The adjustment data will be automatically input to page: F, addresses: 3E to 42, 76 to 7B.)

7) Select page: 2, address: 02, and check that the data is "01".

Processing after Completing Adjustments

1) Turn OFF the main power supply (8.4V).

2) Perform "Flange Adjustment (2)".

3-2. Flange Back Adjustment (2)

Perform this adjustment after performing "Flange Back Adjustment (1)".

Subject	Subject more than 500m away (Subjects with clear contrast such as buildings, etc.)
Measurement Point	Check operation on TV monitor
Measuring Instrument	
Adjustment Page	F
Adjustment Address	3E to 42, 76 to 7B

Switch setting:

- 1) NIGHT SHOT switch OFF

Adjusting method:

- 1) Set the zoom lens to the TELE end and expose a subject that is more than 500 m away (subject with clear contrast such as building, etc.). (Nearby subjects less than 500 m away should not be in the screen.)
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: 2, address: 02, and check that the data is "00".
- 4) Select page: 2, address: 01, set data: 13, and press the PAUSE button of the adjusting remote commander.
- 5) Place a ND filter on the lens so that the optimum image is obtain.
- 6) Select page: 2, address: 01, set data: 29, and press the PAUSE button of the adjusting remote commander.
(The adjustment data will be automatically input to page: F, addresses: 3E to 42, 76 to 7B.)
- 8) Select page: 2, address: 02, and check that the data is "01".

Processing after Completing Adjustments

- 1) Select page: 0, address: 01, and set data: 00. ...
- 2) Turn OFF the main power supply (8.4V).
- 3) Perform "Flange Back Check".

4. Flange Back Check

Subject	Siemens star (2.0 m from the front of the lens) (Luminance: approx. 200 lux)
Measurement Point	Check operation on TV monitor
Measuring Instrument	
Adjustment Page	F
Adjustment Address	3E to 42, 76 to 7B

Switch setting:

- 1) NIGHT SHOT switch OFF

Checking method:

- 1) Place the Siemens star 2.0m from the front of the lens.
- 2) To open the IRIS, decrease the luminous intensity to the Siemens star up to a point before noise appear on the image.
- 3) Select page: 2, address: 40, and set data: 02.
- 4) Select page: 2, address: 41, and set data: 01.
- 5) Shoot the Siemens star with the zoom TELE end.
- 6) Turn on the auto focus.
- 7) Check that the lens is focused (Note1).
- 8) Select page: 2, address: 21, and set data: 10.
- 9) Shoot the Siemens star with the zoom WIDE end.
- 10) Observe the TV monitor and check that the lens is focused.

Note 1: When the auto focus is ON, the lens can be checked if it is focused or not by observing the data on the page 1 of the adjusting remote commander.

- 1) Select page: 0, address: 03, and set data: 0F.
- 2) Page 1 shows the state of the focus.

1 : 00 : XX

→ Odd: Focused
Even: Unfocused

Processing after Completing Adjustments

- 1) Select page: 2, address: 21, and set data: 00.
- 2) Select page: 0, address: 03, and set data: 00.
- 3) Select page: 2, address: 40, and set data: 00.
- 4) Select page: 2, address: 41, and set data: 00.

5. Picture Frame Setting

Subject	Color bar chart standard picture frame (1.5m from the front of the lens)
Measurement Point	Video output terminal
Measuring Instrument	Oscilloscope and TV monitor
Specified Value	$A=B, C=D, t=0 \pm 0.1\text{msec}$

Setting method:

- 1) Adjust the zoom and the camera direction, and set to the specified position.
- 2) Mark the position of the picture frame on the monitor display, and adjust the picture frame to this position in following adjustments using "Color bar chart standard picture frame".

1. Horizontal period

2. Vertical period

Fig. 5-1-7.

Fig. 5-1-8.

6. Color Reproduction Adjustment

Adjust the color Separation matrix coefficient so that proper color reproduction is produced.

Subject	Color bar chart standard picture frame
Measurement Point	Video output terminal
Measuring Instrument	Vectorscope
Adjustment Page	F
Adjustment Address	34, 36, F5, F6
Specified Value	All color luminance points should settle within each color reproduction frame.

Note1: 510H model (CCD-TR57/TR67/TR413PK)
760H model (CCD-TR87/TR414PK/TR917/TR940/
TR940PK)

Switch setting:

1) NIGHT SHOT switch OFF

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 2, address: 01, set data: 3D, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: F, address: 25, set data: 3F, and press the PAUSE button of the adjusting remote commander.
- 4) Adjust the GAIN and PHASE of the vectorscope, and adjust the burst luminance point to the burst position of the color reproduction frame.
- 5) Change the data of page: F, address: 34, 36, F5 and F6, and settle each color luminance point in each color reproduction frame.

Note 2: Be sure to press the PAUSE button of the adjusting remote commander before Changing the addresses. If not, the new data will not be written to the memory.

6) Press the PAUSE button of the adjusting remote commander.

Processing after Completing Adjustments

- 1) Select page: 2, address: 01, and set data: 00, and press the PAUSE button of the adjusting remote commander.
- 2) Select page: 0, address: 01, and set data: 00.

For 510H model

For 760H model

Fig. 5-1-9.

7. IRIS IN/OUT Adjustment

For the unit to judge if the white balance is indoors or outdoors in auto white balance operations, measure the light level and write it in the EEPROM.

If the level is not correct, the white balance will not be accurate.

Subject	Clear chart (Color bar standard picture frame)
Measurement Point	DDS display of EVF or TV monitor
Measuring Instrument	(Note 1)
Adjustment Page	F
Adjustment Address	3C, 3D

Note 1: The right four digits of the display data at the right bottom side of the EVF and TV monitor is the LIGHT LEVEL data.

00 XX XX
 ↳ Lower two digits
 ↳ Upper two digits

Switch setting:

- 1) STEADY SHOT (Menu display) OFF
- 2) NIGHT SHOT switch OFF

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 0, address: 03, and set data: 06.
- 3) Select page: D, address: 11, and set data: 02, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: 2, address: 40, and set data: 02.
- 5) Select page: 2, address: 01, set data: 0B, and press the PAUSE button of the adjusting remote commander.
- 6) Read the DDS display data (Note 1), and take the upper two digits as D₁ and the lower two as D₂.
- 7) Convert D₁ to decimal notation, and obtain D₁'. (Refer to Table 5-1-2. "Hexadecimal notation - decimal notation conversion table" of "Service mode".)
- 8) Calculate D₃' using the following equations. (Equations 1 and 2 are for decimal notation calculation).
 When D₂ ≥ D₀

$$D_3' = D_1' - 21 \text{ Equation 1}$$

 When D₂ < D₀

$$D_3' = D_1' - 22 \text{ Equation 2}$$
- 9) Convert D₃' to hexadecimal notation, and obtain D₃.
- 10) Select page: F, address: 3C, set data: D₃, and press the PAUSE button of the adjusting remote commander.
- 11) Select page: 2, address: 01, set data: 09, and press the PAUSE button of the adjusting remote commander.
- 12) Read the DDS display data (Note 1), and take the upper two digits as D₄ and the lower two as D₅.
- 13) Convert D₄ to decimal notation, and obtain D₄'. (Refer to Table 5-1-2. "Hexadecimal notation - decimal notation conversion table" of "Service mode".)
- 14) Calculate D₆' using the following equations. (Equations 3 and 4 are for decimal notation calculation).
 When D₅ ≥ F₀

$$D_6' = D_4' - 13 \text{ Equation 3}$$

 When D₅ < F₀

$$D_6' = D_4' - 14 \text{ Equation 4}$$
- 15) Convert D₆' to hexadecimal notation, and obtain D₆.
- 16) Select page: F, address: 3D, set data: D₆, and press the PAUSE button of the adjusting remote commander.

Processing after Completing Adjustments

- 1) Select page: D, address: 11, and set data: 00, and press the PAUSE button of the adjusting remote commander.
- 2) Select page: 0, address: 01, and set data: 00.
- 3) Select page: 2, address: 01, and set data: 00, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: 2, address: 40, and set data: 00.
- 5) Select page: 0, address: 03, and set data: 00.

8. MAX GAIN Adjustment

Setting the minimum illumination.

If it is not consistent, the image level required for taking subjects in low illuminance will not be produced (dark).

Subject	Clear chart (Color bar standard picture frame)
Measurement Point	DDS display of EVF or TV monitor
Measuring Instrument	(Note 1)
Adjustment Page	F
Adjustment Address	31
Specified Value	C0 to FF

Note 1: The right two digits of the display data at the right bottom side of the EVF and TV monitor is the object data.

760H model : CCD-TR87/TR414PK/TR917/TR940/
TR940PK

Switch setting:

- 1) STEADY SHOT (Menu display) OFF
- 2) NIGHT SHOT switch OFF

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 11, and set data: 02, and press the PAUSE button of the adjusting remote commander.
- 3) Select of page: 0, address: 03, and set data: 01.
- 4) Select page: 2, address: 40, and set data: 02.
- 5) Select page: 2, address: 56, and set data: 40.
- 6) Select page: 2, address: 01, set data: 19, and press the PAUSE button of the adjusting remote commander.
- 7) Select page: F, address: 31, set data: [18] <08>, and press the PAUSE button of the adjusting remote commander.
 Note : [] : 510H model
 : < > : 760H model
- 8) Check that the DDS display data (Note 1) lies within the specified value.

Processing after Completing Adjustments

- 1) Select page: D, address: 11, and set data: 00, and press the PAUSE button of the adjusting remote commander.
- 2) Select page: 0, address: 01, and set data: 00.
- 3) Select page: 2, address: 01, and set data: 00, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: 2, address: 40, and set data: 00.
- 5) Select page: 2, address: 56, and set data: 00.

9. Auto White Balance Standard Data Input

Subject	Clear chart (Color bar standard picture frame)
Adjustment Page	F
Adjustment Address	70 to 73

Note 1: Perform "Color Reproduction Adjustment" before this adjustment.

Note 2: Check that the data of page: 2, address: 02 is 00. If not, turn the power of the unit OFF/ON.

Switch setting:

1) NIGHT SHOT switch OFF

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Wait for 2 seconds.
- 3) Select page: 2, address: 01, and set data: 11, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: 2, address: 01, and set data: 0D, and press the PAUSE button of the adjusting remote commander.
(When the standard data is take in, the data will be automatically input to page: F, address: 70 to 73.)
- 5) Select page: 2, address: 02, and check that the data is "01".
- 6) Perform "Auto White Balance Adjustment".

Processing after Completing Adjustments

- 1) Select page: 2, address: 01, and set data: 00, and press the PAUSE button of the adjusting remote commander.
- 2) Select page: 0, address: 01, and set data: 00.

10. Auto White Balance Adjustment

Adjust to the proper auto white balance output data.

If it is not correct, auto white balance and color reproducibility will be poor.

Subject	Clear chart (Color bar standard picture frame)
Filter	Filter C14 for color temperature correction
Measurement Point	DDS display of EVF or TV monitor (Note 1)
Measuring Instrument	(Note 1)
Adjustment Page	F
Adjustment Address	3A, 3B
Specified Value	R ratio: 2B40 to 2BC0 B ratio: 5E40 to 5EC0

Note 1: Perform "Auto White Balance Standard Data Input" before this adjustment.

Note 2: The right four digits of the display data at the right bottom side of the EVF and TV monitor is the object data.

00 XXXX

→ Object data

Switch setting:

1) NIGHT SHOT switch OFF

Adjusting method:

- 1) Place the C14 filter for color temperature correction on the lens.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: D, address: 11, and set data: 02, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: 2, address: 01, and set data: 3F, and press the PAUSE button of the adjusting remote commander.
- 5) Select page: 0, address: 03, and set data: 04.
- 6) Select page: F, address: 3A, and change the data, and adjust the average value of the DDS display data(Note 2) to the R ratio specified value.
- 7) Press the PAUSE button of the adjusting remote commander.
- 8) Select page: 0, address: 03, and set data: 05.
- 9) Select page: F, address: 3B, and change the data, and adjust the average value of the DDS display data(Note 2) to the B ratio specified value.
- 10) Press the PAUSE button of the adjusting remote commander.

Processing after Completing Adjustments

- 1) Select page: D, address: 11, and set data: 00, and press the PAUSE button of the adjusting remote commander.
- 2) Select page: 0, address: 01, and set data: 00.
- 3) Select page: 2, address: 01, and set data: 00, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: 0, address: 03, and set data: 00.

11. White Balance Check

Subject	Clear chart (Color bar standard picture frame)
Filter	Filter C14 for color temperature correction ND filter 1.0 and 0.3
Measurement Point	video output terminal
Measuring Instrument	Vectorscope
Specified Value	Fig. 5-1-10. A to C

Switch setting:

- 1) NIGHT SHOT switch OFF

Checking method:

- 1) Check that the lens is not covered with either filter.
- 2) Select page: 2, address: 01, set data: 0F, and press the PAUSE button of the adjusting remote commander.
- 3) Check that the center of the white luminance point is within the circle shown Fig. 5-1-10.A.
- 4) Select page: 2, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 5) Select page: 2, address: 01, set data: 23, and press the PAUSE button of the adjusting remote commander.
- 6) Place the C14 filter on the lens.
- 7) Check that the center of the white luminance point settles in the circle shown Fig. 5-1-10.B.
- 8) Remove the C14 filter, and place the ND filter 1.3 (1.0 + 0.3) on the lens.
- 9) Check that the white luminance point stopped moving, and then remove the ND filter 1.3.
- 10) Check that the center of the white luminance point settles within the circle shown Fig. 5-1-10.C.

Processing after Completing Adjustments

- 1) Select page: 2, address: 01, and set data: 00, and press the PAUSE button of the adjusting remote commander.

Fig.5-1-10. A

Fig.5-1-10. B

Fig.5-1-10. C

12. Angular Velocity Sensor Sensitivity Adjustment

- This adjustment is performed only when replacing the angular velocity sensor.

Although this adjustment need not be performed when the circuit is damaged, etc., check the operations.

- Note down the sensitivity displayed on the angular velocity sensor of the repair parts. At this time, note down also to which board it was attached to.

Be sure to check because if attached incorrectly, the screen will vibrate up and down or left and right during hand-shake correction operations.

Precautions on the Parts Replacement

There are two types of repair parts.

TYPE A : ENC03EA or ENC03JA

TYPE B : ENC03EB or ENC03JB

Replace the broken sensor with a same type sensor. If replace with other parts, the image will vibrate up and down or left and right during hand-shake correction operations. After replacing, re-adjust according to the adjusting method after replacement.

Precautions on Angular Velocity Sensor

The sensor incorporates a precision oscillator. Handle it with care as if it dropped, the balance of the oscillator will be disrupted and operations will not be performed properly.

Adjustment page	F
Adjustment Address	43, 44

Note: The sensor sensitivity of SE451 and SE452 of the SE-65 board is written only on the repair parts.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Read the sensor sensitivity written on SE451 of the SE-65 board, and take this as S_{451} .
- 3) Read the sensor sensitivity written on SE452 of the SE-65 board, and take this as S_{452} .
- 4) Calculate D_{43}' and D_{44}' using the following equation (decimal calculation).
$$D_{43}' = 85 / S_{451}$$
$$D_{44}' = 90 / S_{452}$$
- 5) Convert D_{43}' and D_{44}' into hexadecimal digits, to obtain D_{43} and D_{44} . (Round off decimal points)
- 6) Select page: F, address: 43, set data: D_{43} , and press the PAUSE button of the adjusting remote commander.
- 7) Select page: F, address: 44, set data: D_{44} , and press the PAUSE button of the adjusting remote commander.

Processing after Completing Adjustments

- 1) Select page: 0, address: 01, and set data: 00.
- 2) Check that the steady shot operations have been performed normally.

1-4. COLOR ELECTRONIC VIEWFINDER SYSTEM ADJUSTMENT

Note 1: The back light (fluorescent tube) is driven by a high voltage AC power supply. Therefore, do not touch the back light holder to avoid electrical shock.

Note 2: When replacing the LCD unit, be careful to prevent damages caused by static electricity.

[Adjusting connector]

Most of the measuring points for adjusting the viewfinder system are concentrated in CN910 of the VC-195 board.

Connect the measuring instruments via the CPC-7 jig (J-6082-382-A).

The following table shows the Pin No. and signal name of CN910.

Pin No.	Signal Name	Pin No.	Signal Name
1	LANC SIG	9	RF AGC OUT
2	XCPC IN	10	REC RF
3	IR VIDEO	11	RF SWP
4	AFC F0	12	CAP FG
5	BPF MONI	13	EVF BL
6	PB RF	14	EVF BL 4.75V
7	RF AGC IN	15	VCO
8	REG GND	16	EVF VG

Fig.5-1-11.

1. EVF Initial Data Input

Mode	VTR stop
Signal	No signal
Adjustment Page	E
Adjusting Address	C2 to CD

Adjusting method:

1) Select page: 0, address: 01, and set data: 01.

2) Select page: E, and input the data in the following table.

Note: To write in the non-volatile memory (EEPROM), press the PAUSE button of the adjusting remote commander each time to set the data.

3) Select page: 0, address: 01, and set data: 00.

Address	Data	Remark
C2	B0	VCO adjustment
C3	80	Bright adjustment
C4	77	Contrast adjustment
C5	80	White balance adjustment
C6	80	White balance adjustment
C7	68	Fixed value
C8	50	Fixed value
C9	F8	Fixed value
CA	A8	Fixed value
CB	3C	Fixed value
CC	B0	Backlight Consumption Current Adjustment
CD	70	Fixed value

2. VCO Adjustment (VF-119 board)

Set the VCO free-run frequency. If deviated, the EVF screen will be blurred.

Mode	VTR stop
Signal	No signal
Measurement point	Pin ⑮ of CN910 (VCO) on VC-195 board
Measuring instrument	Oscilloscope (DC range)
Adjustment page	E
Adjustment address	C2
Specified value	$A = 1.8 \pm 0.1 \text{ Vdc}$

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 55, and press the PAUSE button of the adjusting remote commander.
- 3) Check the GND level of the oscilloscope.
- 5) Select page: E, address: C2, change the data and set the VCO output voltage (A) to the specified value.
- 4) Press the PAUSE button of the adjusting remote commander.
- 5) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-1-12.

3. Bright Adjustment (VF-119 board)

Set the level of the VIDEO signal for driving the LCD to the specified value. If deviated, the screen image will be blackish or saturated (whitish).

Mode	VTR stop
Signal	No signal
Measurement point	Pin ⑮ of CN910 (EVF VG) on VC-195 board
Measuring instrument	Oscilloscope
Adjustment page	E
Adjustment address	C3
Specified value	$A = 7.2 \pm 0.1 \text{ V}$

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 55, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: E, address: C3, change the data and set the voltage (A) between the reversed waveform pedestal and non-reversed waveform pedestal to the specified value.
- 4) Press the PAUSE button of the adjusting remote commander.
- 5) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-1-13.

4. Contrast Adjustment (VF-119 board)

Set the level of the VIDEO signal for driving the LCD to the specified value. If deviated, the screen image will be blackish or saturated (whitish).

Mode	VTR stop
Signal	No signal
Measurement Point	Pin ⑮ of CN910 (EVF VG) on VC-195 board
Measuring Instrument	Oscilloscope
Adjustment Page	E
Adjustment Address	C4
Specified Value	$A = 2.1 \pm 0.1V$

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 55, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: E, address: C4, change the data and set the voltage (A) between the 7 step peak and the pedestal to the specified value.
- 4) Press the PAUSE button of the adjusting remote commander.
- 5) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-1-14.

5. Backlight Consumption Current Adjustment (VF-120 board)

Set the backlight luminance and color temperature. If deviated, the image may become dark or bright.

Mode	VTR stop
Signal	No signal
Measurement Point	+ Probe: Pin ⑭ of CN910 (EVF BL 4.75V) on VC-195 board - Probe: Pin ⑬ of CN910 (EVF BL) on VC-195 board
Measuring Instrument	Digital voltmeter
Adjustment Page	E
Adjustment Address	CC
Specified Value	$A = 21.0 \pm 1.0 \text{ mVdc}$

Note: Adjust 30 seconds after running on the power supply.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 55, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: E, address: CC, change the data and set the voltage difference (A) between Pin ⑭ of CN910 (EVF BL 4.75V) and Pin ⑬ of CN910 (EVF BL) to the specified value.
- 4) Press the PAUSE button of the adjusting remote commander.
- 5) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

6. White Balance Adjustment (VF-119 board)

Correct the white balance.

If deviated, the reproduction of the EVF screen may degenerate.

Mode	VTR stop
Signal	No signal
Measurement Point	Check on EVF screen
Measuring Instrument	
Adjustment Page	E
Adjustment Address	C5, C6
Specified Value	The EVF screen should not be colored.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 51, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: 2, address: 7D, and set data: 03.
- 4) Select page: E, address: C5 and C6, set the data to the initial value.

Note: To write in the non-volatile memory (EEPROM), press the PAUSE button of the adjusting remote commander each time to set the data.

Address	C5	C6
Data	80	80

- 5) Check that the LCD screen is not colored. If colored, change the data of page: E, address: C5 and C6 so that the EVF screen is not colored.

Note: To write in the non-volatile memory (EEPROM), press the PAUSE button of the adjusting remote commander each time to set the data.

- 6) Select page: 2, address: 7D, and set data: 00.
- 7) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 8) Select page: 0, address: 01, and set data: 00.

5-2. MECHANICAL SECTION ADJUSTMENT

Mechanism Parts Adjustments

For details on the adjustments and checks of mechanical section and replacements of mechanism parts, refer to the separate volume-
“8 mm Video Mechanism Adjustment Manual VII **[B Mechanism]**”.

2-1. OPERATING WITHOUT A CASSETTE

- 1) Refer to “Section 2 DISASSEMBLY” and supply the power with the cabinet removed. (So that the mechanical deck can be operated.)
- 2) Connect the adjusting remote commander to the LANC terminal.
- 3) Turn on the HOLD switch of the adjusting remote commander.
- 4) Close the cassette compartment without loading a cassette and complete loading.
- 5) Select page: 0, address: 01, and set data: 01.
- 6) Select page: F, address: 2A, and set data: 01, and press the PAUSE button of the adjusting remote commander.
- 7) Select page: D, address: 10, and set data: 10, and press the PAUSE button of the adjusting remote commander.
- 8) Disconnect the power supply of the unit.

By carrying out the above procedure, the unit can be operated without loading a cassette.

Be sure to carry out “Processing after Operations” after checking the operations.

Set the data of page: D, address: 10 to the following if the sensor ineffective mode, forced PLAYER (VTR) power supply ON mode or forced camera power supply ON mode are to be used together.

Forced VTR power supply ON mode 12

Forced camera power supply ON mode 11

[Processing after Operations]

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: F, address: 2A, and set data: 00, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: D, address: 10, and set data: 00, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: 0, address: 01, and set data: 00.
- 5) Disconnect the power supply of the unit.

2-2. TAPE PATH ADJUSTMENT

1. Preparations for adjustments

- 1) Clean the tape path face (tape guide, drum, capstan shaft, pinch roller).
- 2) Connect the adjusting remote commander to the LANC terminal.
- 3) Turn on the HOLD switch of the adjusting remote commander.
- 4) Select page: 0, address: 01, and set data: 01.
- 5) Select page: F, address: 2A, and set data: 04 and press the PAUSE button of the adjusting remote commander.
(Be sure to perform “Processing after operations” after completing adjustments.
- 6) Connect the oscilloscope.
Channel 1: Pin ⑥ of CN910 of VC-195 board
External trigger: Pin ⑪ of CN910 of VC-195 board
(Connect the oscilloscope via the CPC-7 jig)
(J-6082-382-A).
- 7) Playback the alignment tape for tracking.
WR5-1NP
- 8) Check that the RF waveform of the oscilloscope is flat at both the entrance and the exit.
If not flat, perform necessary adjustment according to the separate
“8 mm Video Mechanism Adjustment Manual VII (B Mechanism)”.
- 9) Perform “Processing after operations”, after completing adjustments.

CN910 of VC-195 board

Pin No.	Signal Name	Pin No.	Signal Name
1	LANC SIG	9	RF AGC OUT
2	XCPC IN	10	REC RF
3	IR VIDEO	11	RF SWP
4	AFC F0	12	CAP FG
5	BPF MONI	13	EVF BL
6	PB RF	14	EVF BL 4.75V
7	RF AGC IN	15	VCO
8	REG GND	16	EVF VG

[Processing after operations]

- 1) Connect the adjusting remote commander, and turn on the HOLD switch.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: F, address: 2A, and set data: 00.
- 4) Press the PAUSE buttonA of the adjusting remote commander.
- 5) Select page: 0, address: 01, and set data: 00.
- 6) Remove the power supply from the unit.

Fig. 5-2-1.

5-3. VIDEO SECTION ADJUSTMENTS

When performing adjustments, refer to the layout diagrams for adjustment related parts beginning from page 5-52.

3-1. PREPARATIONS BEFORE ADJUSTMENT

The following adjusting instruments are used for adjusting the video section.

3-1-1. Equipments to be Used

- 1) TV monitor
- 2) Oscilloscope: 2 phenomena, band 30 MHz or wider, with delay mode. (Use a 10:1 probe unless specified otherwise.)
- 3) Frequency counter
- 4) Pattern generator with video output terminal
- 5) Digital voltmeter
- 6) Audio generator
- 7) Audio level meter
- 8) Audio distortion meter
- 9) Audio attenuator
- 10) Regulated power supply
- 11) Alignment tape

- For tracking adjustment (WR5-1NP)
Part Code: 8-967-995-02
- For video frequency characteristics adjustment (WR5-7NE) Part Code: 8-967-995-13
- For checking Standard 8 mode operations
For LP (WR5-4NL)
Part Code: 8-967-995-51
For SP (WR5-5NSP)
Part Code: 8-967-995-42

Note: The following alignment tapes can also be used.

- 1) WR5-4NSP (8-967-995-41)
- For checking Hi8 mode operations
For SP (WR5-8NSE)
Part Code: 8-967-995-43
For LP (WR5-8NLE)
Part Code: 8-967-995-52
- For checking AFM stereo operations (WR5-9NS)
Part Code: 8-967-995-23
For checking BPF adjustment (WR5-11NS)
Part Code: 8-967-995-71

- 12) Remote commander for adjustment (J-6082-053-B)
- 13) CPC-7 jig Part Code: J-6082-382-A
- 14) Power code Part Code: J-6082-223-A

Note: Connect the adjusting remote commander to the LANC jack, and set the HOLD switch to the "ADJ" side.

- 15) AFM DEV jig (J-6082-312-A)
- 16) IR Receiving jig (J-6082-383-A)
- 17) Extension cable (48P, 0.8mm) (J-6082-188-A)

3-1-2. Precautions on Adjusting

- 1) The adjustments of this unit are performed in the VTR mode or camera mode.

To set to the VTR mode, set the power switch to "VTR" (or "PLAYER") or set the "Forced VTR Power ON mode" using the adjusting remote commander (Note 1).

To set to the Camera mode, set the power switch to "CAMERA" or set the "Forced Camera Power ON mode" using the adjusting remote commander (Note 2).

After completing adjustments, be sure to exit the "Forced VTR Power ON Mode" or "Forced Camera Power ON Mode".

(Note 3)

- 2) By setting the "Forced VTR Power ON mode" or "Forced Camera Power ON mode", the video section can be operate even if even if the front panel block (MA-311 board, power switch, microphone unit) has been removed. When removing the front panel block disconnect the following connector.

1. VC-195 board CN903 (23P 0.5mm)

- 3) The lens block (CD-181 board) need not be connected except during battery end adjustment. To remove, disconnect the following connectors.

1. VC-195 board CN501 (16P, 0.5mm)

2. VC-195 board CN551 (23P, 0.5mm)

- 4) Video light (Video light model) need not be assembled. If removing it, disconnect the following connector.

1. VC-195 board CN909 (10P, 0.5mm)

- 5) Cabinet (R) (Camera function switch (CF-49 board), viewfinder) need not be connected. But removing the cabinet (R) (removing the VC-195 board CN911) means removing the lithium 3V power supply (CF-49 board), data such as date, time, user-set menus will be lost. After completing adjustments, reset these data. If the cabinet (R) has been removed, the self-diagnosis data, data on history of use (total drum rotation time etc.) will be lost. Before removing, note down the self-diagnosis data and data on history of use. (Refer to the "Service Mode" for the data on the history use.) To remove the cabinet (R), disconnect the following connectors.

1. VC-195 board CN911 (50P, 0.5mm)

Note 1: Setting the "Forced VTR Power ON" mode (VTR mode)

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 10, set data: 02, and press the PAUSE button of the adjusting remote commander.

The above procedure will enable the VTR power to be turned on with the front panel block removed.

After completing adjustments, be sure to exit the "Forced VTR Power ON mode".

Note 2: Setting the "Forced Camera Power ON" mode (Camera mode)

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 10, set data: 01, and press the PAUSE button of the adjusting remote commander.

The above procedure will enable the camera power to be turned on with the front panel block removed.

After completing adjustments, be sure to exit the "Forced Camera Power ON mode".

Note 3: Exiting the "Forced Power ON" mode

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 10, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: 0, address: 01, and set data: 00.

3-1-3. Adjusting Connectors

Some of the adjusting points of the video section are concentrated at VC-195 board CN910. Connect the measuring instruments via the CPC-7 jig (J-6082-382-A). The following table lists the pin numbers and signal names of CN910.

Pin No.	Signal Name	Pin No.	Signal Name
1	LANC SIG	9	RF AGC OUT
2	XCPC IN	10	REC RF
3	IR VIDEO	11	RF SWP
4	AFC F0	12	CAP FG
5	BPF MONI	13	EVF BL
6	PB RF	14	EVF BL 4.75V
7	RF AGC IN	15	VCO
8	REG GND	16	EVF VG

Table 5-3-1.

Fig. 5-3-1.

3-1-4. Connecting the Equipments

Connect the measuring instruments as shown in Fig. 5-3-2 and perform the adjustments.

Fig. 5-3-2.

3-1-5. Alignment Tape

The following table lists alignment tapes which are available. Use the tape specified in the signal column for each adjustment. If the type of tape to be used for checking operations is not specified, use whichever type.

Name	Record-ing mode	Tape type	Tape speed	Usage
Tracking WR5-1NP	Standard 8 mm	MP	SP	Tape path adjustment Switching position adjustment
Video frequency characteristics WR5-7NE	Hi8	ME	SP	Frequency characteristics adjustment
Operation check (SP mode) WR5-5NSP	Standard 8 mm	MP	SP	Checking operations
Operation check (SP mode) WR5-8NSE	Hi8	ME	SP	
Operation check (LP mode) WR5-4NL	Standard 8 mm	MP	LP	
Operation check (LP mode) WR5-8NLE	Hi8	ME	LP	
AFM stereo Operation check WR5-9NS	Standard 8 mm	MP	SP	AFM stereo Checking operations
BPF adjustment WR5-11NS	Standard 8 mm	MP	SP	BPF adjustment

Tape type
MP Particle type metal tape
ME Evaporated type metal tape

Table 5-3-2.

Fig. 5-3-3. shows the 75% color bar signals recorded on the alignment tape.

Note: Measure using the VIDEO terminal (Terminated at 75 Ω).

Fig. 5-3-3. Color Bar Signals of the Alignment Tape

3-1-6. Input/Output Level and Impedance

Video input/output

Phono jack, 1 Vp-p, 75Ω,
unbalanced, sync negative

S video input/output (Hi8 model)

4-pin mini DIN

Luminance signal:

1Vp-p, 75Ω, unbalanced, sync negative

Chrominance signal:

0.286Vp-p 75Ω, unbalanced

Audio input/output

Phono jack,

Input: -7.5 dBs, input impedance more
than 47 kΩ

Output: -7.5 dBs, (at load impedance 47 kΩ),
impedance less than 2.2 kΩ

3-1-7. Recording Mode (Standard 8/Hi8) switching (Hi8 model)

The record mode (Standard 8/Hi8) of this unit switches as shown in the following table. The playback mode (Standard 8/Hi8) switches automatically according to the recording mode of the tape played back.

Tape Used	Recording Mode
ME	Hi8
Hi8 MP	
MP	Standard 8

3-1-8. Service Mode

Additional note on adjustment

Note: After the completion of the all adjustments, cancel the service mode by either of the following ways.

- 1) Unplug the main power supply and remove the lithium battery.
(In this case, date and time and menu setting have been set by users are canceled. Perform resetting.)
- 2) After data on page: D and F is restored, select page: 0, address: 01, and return the data to 00. And when data on page: 3 is changed, return the data to the original condition.

1. Test mode setting

Set/release each test mode. Select page: 0, address: 01, and set data: 01 before setting the data of page D and F.

Page F	Address 2A
--------	------------

Data	Function
00	Normal
01	Test mode Various emergency prohibitions and releases Drum emergency, capstan emergency, loading motor emergency, reel emergency, tape top and end, DEW detection

Page D	Address 10
--------	------------

Data	Function
00	Normal
01	Camera power ON
02	VTR power ON
03	Camera+VTR power ON

- * For page D and F, the data set will be recorded in the nonvolatile memory by pressing the PAUSE button on the adjusting remote commander. Take note that, in this case, the test mode will not be released even if the main power has been turned off (8.4 Vdc).
- * Be sure to return this address data to 00 after completing adjustments/repairs and press the PAUSE button of the adjusting remote commander. And select page: 0, address: 01, and set data: 00.

2. Emergency Memory Address

Page F	Address 10 to 1B
--------	------------------

Address	Contents
10	1st EMG code
12	Upper: MSW code when the mechanism starts shifting the 1st time Lower: MSW code when the 1st emergency occurs
13	Lower: Target MSW code of the 1st emergency occurs
14	2nd EMG code
16	Upper: MSW code when the mechanism starts shifting the 2nd time Lower: MSW code when the 2nd emergency occurs
17	Lower: Target MSW code of the 2nd emergency occurs
18	Last EMG code
1A	Upper: MSW code when the mechanism starts shifting the last time Lower: MSW code when the last emergency occurs
1B	Lower: Target MSW code of the last emergency occurs

When there are no emergency, data 00 will be written in the above addresses (10 to 1B). When the first emergency occurs, the data corresponding to the emergency will be written in the address (10 to 13) for this first emergency. In the same way, when the second emergency occurs, the data corresponding to the emergency will be written in the address (14 to 17) for this second emergency.

The data corresponding to the emergency occurring the last will be written in the address (18 to 1B) for this last emergency.

Therefore the data of addresses 18 to 1B are renewed each time an emergency occurs.

Note 1: Be sure to rewrite the data of addresses 10 to 1B to 00 after repairs/adjustments.

Note 2: When rewriting the data, be sure to press the PAUSE button of the remote commander after setting the data.

2-1. EMG CODE (Emergency Code)

The codes shown in the following table which correspond to errors that occur are recorded in addresses 10, 14, and 18.

Code	Type of Emergency
00	No error
10	Loading motor time-out during load
11	Loading motor time-out during unload
20	T reel emergency (reel slack) during unloading
21	S reel emergency (reel slack) during unloading
22	T reel emergency
23	S reel emergency
30	FG emergency at the start up of the capstan
31	FG emergency during the normal rotation of the capstan
40	FG emergency at the start up of the drum
41	PG emergency at the start up of the drum
42	FG emergency during the normal rotation of the drum
43	PG emergency during the normal rotation of the drum
44	Phase emergency during the normal rotation of the drum

- The lower parts of the data of addresses 12, 16 and 1A represent the MSW codes (mode switch, mechanism position) when errors occurs.
- The upper parts of the data of addresses 12, 16 and 1A represent, when the mechanism position is to be moved, the MSW codes at the start of movement (when moving the loading motor).
- The lower parts of the data of addresses 13, 17 and 1B represent the MSW codes of the desired movement when the mechanism position is to be moved.

Mechanism Position	MSW Code	Contents
EJECT	1	Position at which the cassette compartment lock is released. The mechanism will not move any further in the unloading direction.
BL	7	BLANC code. Between two codes. The mechanism will not be stopped by this code while it is operating.
USE	3	EJECT completion position. When the cassette is ejected, the mechanism will stop at this position.
LOAD	2	Code during loading/unloading. Code that is used while the LS chassis is moving.
STOP	6	Normal stop position. The pinch roller separates, the tension regulator returns, and the brakes of both reels turn on.
TURN	4	Position at which is used when the pendulum gear swings from S to T or from T to S.
RECP/PB	0	PB, REC, CUE, REV, PAUSE, FF positions. The pinch roller is pressed and tension regulator is on.
REW	5	REW position. REW are carried at this position. The mechanism will not move any further in the loading direction.

3. Bit value discrimination

Bit values must be discriminated using the display data of the adjusting remote commander for the following items. Use the table below to discriminate if the bit value is “1” or “0”.

Remote controller display	Bit value			
	bit 3 or bit 7	bit 2 or bit 6	bit 1 or bit 5	bit 0 or bit 4
0	0	0	0	0
1	0	0	0	1
2	0	0	1	0
3	0	0	1	1
4	0	1	0	0
5	0	1	0	1
6	0	1	1	0
7	0	1	1	1
Ⓐ → 8	1	0	0	0
9	1	0	0	1
A (F)	1	0	1	0
B (b)	1	0	1	1
C (c)	1	1	0	0
D (d)	1	1	0	1
Ⓑ → E (E)	1	1	1	0
F (F)	1	1	1	1

(Example) If the remote commander display data is “8E”, bit values from bit7 to bit4 can be discriminated from column Ⓐ, and those from bit3 to bit0 from column Ⓑ.

4. Switch check (1)

Page 3	Address 43
--------	------------

Bit	Function	When bit value=1	When bit value=0
0	VTR MODE SW	OFF	ON
1	CAM MODE SW	OFF	ON
2	START/STOP SW	OFF	ON
3	EJECT SW	OFF	ON
4	CC DOWN SW	OFF	ON
5			
6			
7			

Using method:

- 1) Select page: 3, address: 43.
- 2) By discriminating the bit value of display data, the state of the switches can be discriminated.

5. Switch check (2)

Page 3	Address 60 to 65
--------	------------------

Using method:

- 1) Select page: 3, address: 60 to 65.
- 2) By discriminating the display data, the pressed key can be discriminated.

Address	Data							
	00 to 0D	0E to 29	2A to 46	47 to 68	69 to 90	91 to BE	BF to EA	EB to FF
60 (AD0: IC604 ㉔)	LASER LINK (FK-8500 S008)	STOP (FK-8500 S001)	FF (FK-8500 S003)	REC (FK-8500 S005, 007)	EDIT SEARCH (+) (FK8500 S009)	EDIT SEARCH (-) (FK8500 S010)		No key input
61 (AD1: IC604 ㉕)		PAUSE (FK-8500 S002)	REW (FK-8500 S004)	PLAY (FK-8500 S006)				No key input
62 (AD2: IC604 ㉖)		PICTURE EFFECT (CF-49 S006)	MENU (CF-49 S010)	EXECUTE (CF-49 S015)	TIME (CF-49 S021)	5sec REC (CF-49 S024)	PUSHING REC (CF-49 S024)	NORMAL REC (CF-49 S024)
63 (AD3: IC604 ㉗)	PROGRAM AE SPOT LIGHT (CF-49 S020)	PROGRAM AE PORTRAIT (CF-49 S020)	PROGRAM AE SPORTS LESSON (CF-49 S020)	PROGRAM AE BEACH & SKI (CF-49 S020)	PROGRAM AE SUNSET & MOON (CF-49 S020)	PROGRAM AE LANDSCAPE (CF-49 S020)		PROGRAM AE AUTO (CF-49 S020)
64 (AD4: IC604 ㉘)			EXPOSURE (CF-49 S012)	BACK LIGHT (CF-49 S017)	FADER (MF-8500 S002)	FOCUS INFINITY (MF-8500 S001)	FOCUS AUTO (MF-8500 S001)	FOCUS MANUAL (MF-8500 S001)
65 (AD5: IC604 ㉙)	DATE (CF-49 S003)	COUNTER RESET (CF-49 S008)		TITLE (CF-49 S018)				No key input

6. Headphone jack check

Page 3	Address 45
--------	------------

Bit	Function	When bit value=1	When bit value=0
1	Headphone jack	Headphone jack is used	

Using method:

- 1) Select page: 3, address: 45.
- 2) By discriminating the bit value of display data, the state of the headphone jack can be discriminated.

7. Input/output selection check

Page 3	Address 49
--------	------------

Bit	Function	When bit value=1	When bit value=0
1			
2			
3			
4	MIC jack		MIC jack is used
5	AUDIO terminal	Monaural	Stereo
6	VIDEO terminal	VIDEO terminal is used	
7	S VIDEO terminal		S VIDEO terminal is used

Using method:

- 1) Select page: 3, address: 49.
- 2) By discriminating the bit value of display data, the state of the input/output selection can be discriminated.

8. LED, LCD (display window) check

Page 3	Address 05	Bit5
--------	------------	------

Using method:

- 1) Select page: 3, address: 05, and set the bit value of Bit5 to "1".
- 2) Check that all LED are lit and all segments of LCD (display window) are lit.
- 3) Select page: 3, address: 05, and set the bit value of Bit5 to "0".

9. Record of Use Check

Page 3	Address A2 to AA
--------	------------------

Address	Function	Remarks
A2	Drum rotation counted time (BCD code)	Hour (H)
A3		1000th place digit and 100th place digit of counted time (decimal digit)
A4		Hour (L)
A5	User initial power on date (BCD code)	Minute
A6		Year
A7		Month
A8	Final condensation occurrence date (BCD code)	Day
A9		Year
AA		Month

Using method:

- 1) The record of use data is displayed at page: 3, addresses: A2 to AA.

Note: This data will be erased when the coin lithium battery is removed (reset).

3-2. SYSTEM CONTROL SYSTEM ADJUSTMENT

1. Initialization of D, E, F Page Data

If the D, E, F page data is erased due to some reason, perform "1-2. INITIALIZATION OF D, E, F PAGE DATA", of "5-1. CAMERA SECTION ADJUSTMENT".

2. Battery End Adjustment (VC-195 board)

Set the battery end voltage.

If the voltage is incorrect, the life of the battery will shorten.

The image at the battery end will also be rough.

Mode	Camera recording
Subject	Arbitrary
Measurement Point	LCD display of the adjusting remote commander
Measuring Instrument	commander
Adjustment Page	D
Specified value	30 to 34

Note 1: The lens block and cabinet (R) must be connected.

Switch setting

- 1) AUTO FOCUS OFF
- 2) NIGHT SHOT OFF
(NIGHT SHOT model)
- 3) VIDEO LIGHT OFF
(VIDEO LIGHT model)

Connection:

- 1) Connect the regulated power supply and the digital voltmeter to the battery terminal as shown in Fig. 5-3-4.

Adjusting method:

- 1) Adjust the output voltage of the regulated power supply so that the digital voltmeter display is $6.1 \pm 0.1 \text{ Vdc}$.
- 2) Turn off the power supply.
- 3) Turn on the HOLD switch of the adjusting remote commander.
- 4) Turn on the power supply.
- 5) Load a cassette, and set to the camera recording mode.
- 6) Select page: 0, address: 01, and set data: 01.
- 7) Decrease the output voltage of the regulated power supply so that the digital voltmeter display is $5.30 \pm 0.01 \text{ Vdc}$.
- 8) Select page: 3, address: 5D, read the data, and this data is named Dref.
- 9) Select page: D, address: 30, set data: Dref, and then press the PAUSE button of the adjusting remote commander.
- 10) Convert Dref to decimal notation, and obtain Dref'. (Refer to Table 5-1-2. "Hexadecimal-decimal conversion table")
- 11) Calculate D_{31}' , D_{32}' , D_{33}' and D_{34}' using following equations (decimal calculation), convert it to a hexadecimal number, and input each adjustment address.

Address: 31	$D_{31}' = \text{Dref}' + 5$
Address: 32	$D_{32}' = \text{Dref}' + 32$
Address: 33	$D_{33}' = \text{Dref}' + 53$
Address: 34	$D_{34}' = \text{Dref}' + 64$

Note 3: After setting each data, be sure to press the PAUSE button.

- 12) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-4.

3-3. SERVO SYSTEM ADJUSTMENTS

1. CAP FG Offset Adjustment (VC-195 board)

Improve the capstan servo characteristic. If it is not correct, jitters will increase.

Mode	Camera recording (SP mode)
Subject	Arbitrary
Measurement Point	Pin ⑫ of CN910 (CAP FG)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	69
Specified value	Duty = 50±1%

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 2, address: 01, and set data: 81, and press the PAUSE button of the adjustment remote commander. (to start up automatic CAP FG offset adjustment.)
- 3) Select page: 2, address: 02, and check that the data is "01".
- 4) Check that Duty of CAP FG signal satisfies the specified value. If not, select page: 2, address: 01, set data: 00, and press the PAUSE button, and then, repeat steps 2) to 4).
- 5) Select page: 2, address: 01, and set data: 00, and press the PAUSE button of the adjustment remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-5.

2. Switching Position Adjustment (VC-195 Board)

If deviated in this case causes switching noise or jitter on the played back screen.

Mode	Playback
Signal	Alignment tape: For tracking adjustment (WR5-1NP)
Measurement Point	CH1: Pin ⑪ of CN910 (RF SWP) CH2: Pin ⑥ of CN910 (PB RF)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	7C, 7D
Specified Value	t1 = 0±10μsec

Adjusting Method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: F, address: 2A, and set data: 20, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: F, address: 7C, change the data and minimize "t1", and then press the PAUSE button of the adjustment remote commander. (Coarse adjustment)
- 4) Select page: F, address: 7D, change the data and adjust so that the switching position (t1) becomes the specified value. (Fine adjustment)
- 5) Press the PAUSE button of the adjustment remote commander.
- 6) Select page: F, address: 2A, and set data: 00, and press the PAUSE button of the adjustment remote commander.
- 7) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-6.

3. NTSC LP mode Switching Position Adjustment (VC-195 Board) (CCD-TR917/ TR940/ TR940PK)

If deviated in this case causes switching noise or jitter on the LP mode played back screen.

Mode	Playback
Signal	Alignment tape: For tracking adjustment (WR5-1NP (NTSC))
Measurement Point	CH1: Pin ⑪ of CN910 (RF SWP) CH2: Pin ⑥ of CN910 (PB RF)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	7E, 7F
Specified Value	$t_1 = 0 \pm 10 \mu\text{sec}$

Adjusting Method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: F, address: 2A, set data: 60, and then press the PAUSE button of the adjustment remote commander.
- 3) Select page: F, address: 7E, change the data and minimize "t1", and then press the PAUSE button of the adjustment remote commander. (Coarse adjustment)
- 4) Select page: F, address: 7F, change the data and adjust so that the switching position (t1) becomes the specified value. (Fine adjustment)
- 5) Select page: F, address: 2A, set data: 00, and then press the PAUSE button of the adjustment remote commander.
- 6) Press the PAUSE button of the adjustment remote commander.
- 7) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-7.

3-4. VIDEO SYSTEM ADJUSTMENTS

Video system adjustments must be performed in the following order.

[Adjusting Order]

1. 28MHz origin oscillation adjustment
2. AFC f0 adjustment
3. Filter f0 adjustment
4. Y OUT level adjustment
5. C OUT level adjustment
6. RP filter f0 adjustment
7. Hi8 REC Y current adjustment
8. Standard REC Y current adjustment
9. Hi8 REC L level adjustment
10. Standard8 REC L level adjustment
11. REC C current adjustment

1. 28 MHz Origin Oscillation Adjustment (VC-195 board)

Set the frequency of the clock for synchronization.

If deviated, the synchronization will be disrupted and the color will become inconsistent.

Mode	VTR stop
Signal	No signal
Measurement Point	Pin ⑥ of IC202 or pin ⑫ of IC501
Measuring Instrument	Frequency counter
Adjustment Page	F
Adjustment Address	2C
Specified Value	Pin ⑥ of IC202 : $f = 3579545 \pm 17 \text{Hz}$ Pin ⑫ of IC501 : $f = 14318181 \pm 68 \text{Hz}$

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 41, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: 2, address: 61, and set data: 30.
- 4) Select page: F, address: 2C, change the data and set the clock frequency(f) to the specified value.
- 5) Press the PAUSE button of the adjusting remote commander.
- 6) Select page: 2, address: 61, and set data: 10.
- 7) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

2. AFC f0 Adjustment (VC-195 board)

Adjust the pull-in range of the A/D converted clock generator during playback.

Mode	VTR stop
Signal	No signal
Measurement Point	Pin ④ of CN910 (AGC f0)
Measuring Instrument	Digital voltmeter
Adjustment Page	F
Adjustment Address	4A
Specified Value	$A = 2.10 \pm 0.05 \text{Vdc}$

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 4D, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: F, address: 4A, change the data and set the DC voltage (A) to the specified value.
- 4) Press the PAUSE button of the adjusting remote commander.
- 5) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

3. Filter f0 Adjustment (VC-195 board)

Minimize the chroma signal residual components during composite video signal input.

Mode	VTR stop
Signal	No signal
Measurement Point	Pin ③ of CN910 (IR VIDEO)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	4D
Specified Value	Minimum residual chroma signal components (A = Below 12mV)

Switch setting:

LASER LINK ON (Red LED is lit)

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 4F, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: F, address: 4D, change the data and minimize the residual chroma signal components (A).
- 4) Press the PAUSE button of the adjusting remote commander.
- 5) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-8.

4. Y OUT Level Adjustment (VC-195 board)

Set the Y signal output level.

Mode	VTR stop
Signal	No signal
Measurement Point	Hi8 model : Y signal terminal of S VIDEO terminal (75 Ω terminated) Standard 8 model : VIDEO terminal (75 Ω terminated)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	49
Specified Value	A = 286 $\pm$ 5mV

Note 1: Insert the plug into the S video terminal (Hi8 model)

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 41, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: 2, address: 61, and set data: 30.
- 4) Select page: F, address: 49, change the data and set the SYNC level (A) to the specified value.
- 5) Press the PAUSE button of the adjusting remote commander.
- 6) Select page: 2, address: 61, and set data: 10.
- 7) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 8) Select page: 0, address: 01, and set data: 00.

Hi8 model

Standard 8 model

Fig. 5-3-9.

5. C OUT Level Adjustment (VC-195 board)

Set the chroma signal output level.

Mode	VTR stop
Signal	No signal
Measurement Point	Hi8 model : Chroma signal terminal of S VIDEO terminal (75 Ω terminated) Standard 8 model : VIDEO terminal (75 Ω terminated)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	4B
Specified Value	A = 286 $\pm$ 5mV

Note 1: Insert the plug into the S video terminal (Hi8 model)

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 41, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: 2, address: 61, and set data: 30.
- 4) Select page: F, address: 4B, change the data and set the burst level (A) to the specified value.
- 5) Press the PAUSE button of the adjusting remote commander.
- 6) Select page: 2, address: 61, and set data: 10.
- 7) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 8) Select page: 0, address: 01, and set data: 00.

Hi8 model

Standard 8 model

Fig. 5-3-10.

6. RP Filter f0 Adjustment (VC-195 board)

Adjust the LPF of the playback RF amplifier.

Mode	VTR stop
Signal	No signal
Measurement Point	Pin ⑨ of CN910 (RF AGC OUT)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	4E
Specified Value	A = Below 10mVp-p

Connection:

- 1) Input a 14.2MHz, 400mVp-p CW signal to Pin ⑦ of CN910 (RF AGC IN).

Transistor : General NPN transistor (2SC403. etc)
 47 Ω resistor : 1-249-401-11
 1 kΩ resistor : 1-249-417-11
 15 kΩ resistor : 1-249-431-11
 0.01 μF capacitor : 1-101-004-00

Fig. 5-3-11.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 35, and press the PAUSE button of the adjusting remote commander.
- 3) Only for Standard8 model, select page: D, address: 15, after memorizing the data, set the bit value of bit0 to "1". (Refer to "3. Bit value discrimination" of "3-1-8. Service Mode".)
- 4) Select page: F, address: 4E, change the data and minimize the 14.2 MHz signal level (A).
- 5) Press the PAUSE button of the adjusting remote commander.
- 6) Select page: D, address: 15, and set the data memorized at step 3), and press the PAUSE button of the adjusting remote commander.
- 7) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 8) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-12.

7. Hi8 REC Y Current Adjustment (VC-195 board) (CCD-TR917/TR940/TR940PK)

Adjust the Y FM signal recording current.

Mode	VTR recording (SP mode)
Signal	No signal
Measurement Point	Pin ⑩ of CN910 (REC RF)
Measuring Instrument	Oscilloscope (20 MHz BW LIMIT: OFF)
Adjustment Page	F
Adjustment Address	53 to 5A
Specified Value	A = 160±5mV

Adjusting method:

- 1) Insert a tape, set to recording mode.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: F, address: 5C, after note down the data, set data: FF, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: F, address: 65, after note down the data, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 5) Select page: 3, address: 01, set data: 41, and press the PAUSE button of the adjusting remote commander.
- 6) Select page: F, address: 54, change the data and set the Y signal level (A) to the specified value.
- 7) Press the PAUSE button of the adjusting remote commander.
- 8) Select page: F, address: 54, and read the data (D54).
- 9) Calculate the adjustment data (hexadecimal) from the following equations (hexadecimal calculation), and input each adjustment address. (Refer to Table 5-1-2. Hexadecimal-Decimal conversion Table.)

$$\begin{aligned} \text{Address: 53} & \quad D_{53} = D_{54} \\ \text{Address: 55} & \quad D_{55} = D_{54} + 10 \\ \text{Address: 56} & \quad D_{56} = D_{54} + 10 \end{aligned}$$

Note: After setting each data, be sure to press the PAUSE button of the adjusting remote commander.

- 10) Write the following data in page: F, address: 57 to 5A.

Address	Data
57	A0
58	80
59	90
5A	80

Note: After setting each data, be sure to press the PAUSE button of the adjusting remote commander.

- 11) Select page: F, address: 5C, set the data noted down at step 3), press the PAUSE button of the adjusting remote commander.
- 12) Select page: F, address: 65, set the data noted down at step 4), press the PAUSE button of the adjusting remote commander.
- 13) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 14) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-13.

8. Standard8 REC Y Current Adjustment (VC-195 board) (CCD-TR57/TR67/TR87/TR413PK/TR414PK)

Adjust the Y FM signal recording current.

Mode	VTR recording (SP mode)
Signal	No signal
Measurement Point	Pin ⑩ of CN910 (REC RF)
Measuring Instrument	Oscilloscope (20 MHz BW LIMIT: OFF)
Adjustment Page	F
Adjustment Address	53 to 5A
Specified Value	A = 170±5mV

Preparations only for the model without REC switch:

- 1) Select page: 0, address: 01, and set data: 01.
- 3) Select page: D, address: 14, after memorizing the data, set the bit value of bit1 to "1". (Refer to "3. Bit value discrimination" of "3-1-8. Service Mode".)
- 4) Select page: D, address: 15, after memorizing the data, set the bit value of bit7 to "0".
- 5) Turn off the HOLD switch of the adjusting remote commander, and press the REC buttons and set to recording mode.

Adjusting method:

- 1) Insert a tape, set to recording mode.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: F, address: 5C, after note down the data, set data: FF, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: F, address: 65, after note down the data, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 5) Select page: 3, address: 01, set data: 41, and press the PAUSE button of the adjusting remote commander.
- 6) Select page: F, address: 54, change the data and set the Y signal level (A) to the specified value.
- 7) Press the PAUSE button of the adjusting remote commander.
- 8) Select page: F, address: 54, and read the data (D54).
- 9) Calculate the adjustment data (hexadecimal) from the following equations (hexadecimal calculation), and input each adjustment address. (Refer to Table 5-1-2. Hexadecimal-Decimal conversion Table.)

Address: 53 D53 = D54
Address: 55 D55 = D54
Address: 56 D56 = D54

Note: After setting each data, be sure to press the PAUSE button of the adjusting remote commander.

- 10) Write the following data in page: F, address: 57 to 5A.

Address	Data
57	80
58	80
59	80
5A	80

Note: After setting each data, be sure to press the PAUSE button of the adjusting remote commander.

- 11) Select page: F, address: 5C, set the data noted down at step 3), press the PAUSE button of the adjusting remote commander.
- 12) Select page: F, address: 65, set the data noted down at step 4), press the PAUSE button of the adjusting remote commander.
- 13) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 14) Select page: 0, address: 01, and set data: 00.

Processing after completed adjustment: only for the model without REC switch:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 14, and set the data memorized at step 3) of "Preparations only for the model without REC switch".
- 3) Press the PAUSE button of the adjusting remote commander.
- 4) Select page: D, address: 15, and set the data memorized at step 4) of "Preparations only for the model without REC switch".
- 5) Press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-14.

9. Hi8 REC L Level Adjustment (VC-195 board) (CCD-TR917/TR940/TR940PK)

Set the recording levels of the REC AFM signal and REC ATF signal. If the level is too low, the audio S/N will deteriorated, tracking will not be stable, or SP/LP will not be discriminated properly. If too high, color beats will be produced on the self-recording/playback image.

Mode	VTR recording (SP mode)
Signal	No signal
Measurement Point	Pin ⑩ of CN910 (REC RF)
Measuring Instrument	Oscilloscope (20MHz BW LIMIT: OFF)
Adjustment Page	F
Adjustment Address	5B to 64
Specified Value	A = 10.1±0.6mV

Note 1: Do not insert a plug into the AUDIO (R) terminal.

Connection:

- 1) Remove C085 (0.01μF, Pin ⑩ of IC202).

Note: After completing “REC L Level Adjustment” and “REC C Current Adjustment”, replace C085 with new parts (1-162-970-11 CERAMIC CHIP 0.01μF 10% 25V).

Adjusting method:

- 1) Insert Hi8 ME tape, set to recording mode.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: F, address: 5B, set data: FF, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: F, address: 65, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 5) Select page: F, address: 5C, change the data and set the REC AFM signal level (A) to the specified value.
- 6) Press the PAUSE button of the adjusting remote commander.
- 7) Select page: F, address: 5C, read the data (D5C).
- 8) Calculate the adjustment data (hexadecimal) from the following equations (hexadecimal calculation), and input each adjustment address. (Refer to Table 5-1-2. Hexadecimal-Decimal conversion Table.)

Address: 5B	D5B = D5C
Address: 5D	D5D = D5C - 0C
Address: 5E	D5E = D5C - 0C
Address: 5F	D5F = D5C + 12
Address: 60	D60 = D5C + 12
Address: 61	D61 = D5C + 13
Address: 62	D62 = D5C + 13

Note: After setting each data, be sure to press the PAUSE button of the adjusting remote commander.

- 9) Write the following data in page: F, address: 63 to 64.

Address	Data
63	7C
64	78

Note: After setting each data, be sure to press the PAUSE button of the adjusting remote commander.

- 10) Select page: 0, address: 01, and set data: 00.

- 11) Perform “REC C Current Adjustment”.

Fig. 5-3-15.

10. Standard8 REC L Level Adjustment (VC-195 board) (CCD-TR57/TR67/TR87/TR413PK/TR414PK)

Set the recording levels of the REC AFM signal and REC ATF signal. If the level is too low, the audio S/N will deteriorated, tracking will not be stable, or SP/LP will not be discriminated properly. If too high, color beats will be produced on the self-recording/playback image.

Mode	VTR recording (SP mode)
Signal	No signal
Measurement Point	Pin ⑩ of CN910 (REC RF)
Measuring Instrument	Oscilloscope (20MHz BW LIMIT: OFF)
Adjustment Page	F
Adjustment Address	5B to 64
Specified Value	A = 9.6 ± 0.6 mV

Note 1: Do not insert a plug into the AUDIO (R) terminal.

Connection:

- 1) Remove C085 (0.01 μ F, Pin ⑩ of IC202).

Note: After completing "REC L Level Adjustment" and "REC C Current Adjustment", replace C085 with new parts (1-162-970-11 CERAMIC CHIP 0.01 μ F 10% 25V).

Preparations only for the model without REC switch:

- 1) Insert Srandrd8 MP tape.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: D, address: 14, after memorizing the data, set the bit value of bit1 to "1". (Refer to "3. Bit value discrimination" of "3-1-8. Service Mode").
- 4) Select page: D, address: 15, after memorizing the data, set the bit value of bit7 to "0".
- 5) Turn off the HOLD switch of the adjusting remote commander, and press the REC buttons and set to recording mode.

Adjusting method:

- 1) Insert Srandrd8 MP tape, set to recording mode.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: F, address: 5B, set data: FF, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: F, address: 65, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 5) Select page: F, address: 5C, change the data and set the REC AFM signal level (A) to the specified value.
- 6) Press the PAUSE button of the adjusting remote commander.
- 7) Select page: F, address: 5C, read the data (D5C).
- 8) Calculate the adjustment data (hexadecimal) from the following equations (hexadecimal calculation), and input each adjustment address. (Refer to Table 5-1-2. Hexadecimal-Decimal conversion Table.)

Address: 5B	D5B = D5C
Address: 5D	D5D = D5C
Address: 5E	D5E = D5C
Address: 5F	D5F = D5C
Address: 60	D60 = D5C
Address: 61	D61 = D5C
Address: 62	D62 = D5C

Note: After setting each data, be sure to press the PAUSE button of the adjusting remote commander.

- 9) Write the following data in page: F, address: 63 to 64.

Address	Data
63	80
64	80

Note: After setting each data, be sure to press the PAUSE button of the adjusting remote commander.

- 10) Select page: 0, address: 01, and set data: 00.

- 11) Perform "REC C Current Adjustment".

Processing after completed adjustment: only for the model without REC switch:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 14, and set the data memorized at step 3) of "Preparations only for the model without REC switch".
- 3) Press the PAUSE button of the adjusting remote commander.
- 4) Select page: D, address: 15, and set the data memorized at step 4) of "Preparations only for the model without REC switch".
- 5) Press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-16.

11. REC C Current Adjustment (VC-195 board)

Set the recording current levels of the REC Chroma signal. If it is too low, chroma signal noise in played back picture will increased. If too high, Y signal noises will increase and white modulation noises will be produced.

Mode	VTR recording (SP mode)
Signal	No signal
Measurement Point	Pin ⑩ of CN910 (REC RF)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	65
Specified Value	Hi8 model : A = $34.6 \pm 1.2\text{mV}$ Standard8 model : A = $30.9 \pm 1.1\text{mV}$

Note 1: HI8 model: CCD-TR917/ TR940/ TR940PK
Standard8 model: CCD-TR57/ TR67/ TR87/
TR413PK/ TR414PK

Connection:

- 1) Remove C085 (0.01 μF , Pin ⑩ of IC202).

Note: After completing "REC L Level Adjustment" and "REC C Current Adjustment", replace C085 with new parts (1-162-970-11 CERAMIC CHIP 0.01 μF 10% 25V).

- 2) Connect Pin ① of IC001 and GND with a 0.01F capacitor.
0.01 μF capacitor: 1-101-004-00

Preparations only for the model without REC switch:

- 1) Select page: 0, address: 01, and set data: 01.
- 3) Select page: D, address: 14, after memorizing the data, set the bit value of bit1 to "1". (Refer to "3. Bit value discrimination" of "3-1-8. Service Mode").
- 4) Select page: D, address: 15, after memorizing the data, set the bit value of bit7 to "0".
- 5) Turn off the HOLD switch of the adjusting remote commander, and press the REC buttons and set to recording mode.

Adjusting method:

- 1) Insert a tape, set to recording mode.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: 3, address: 01, set data: 41, and press the PAUSE button of the adjusting remote commander.
- 4) Select page: 2, address: 61, and set data: 30.
- 5) Select page: F, address: 65, change the data and set the REC chroma signal level (A) to the specified value.
- 6) Press the PAUSE button of the adjusting remote commander.
- 7) Select page: 2, address: 61, and set data: 10.
- 8) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 9) Select page: 0, address: 01, and set data: 00.

Processing after completed adjustment: only for the model without REC switch:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 14, and set the data memorized at step 3) of "Preparations only for the model without REC switch".
- 3) Press the PAUSE button of the adjusting remote commander.
- 4) Select page: D, address: 15, and set the data memorized at step 4) of "Preparations only for the model without REC switch".
- 5) Press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-17.

3-5. IR TRANSMITTER ADJUSTMENTS (CCD-TR87/TR414PK/TR917/TR940/TR940PK)

Adjust using a IR receiver jig (J-6082-383-A).

Switch setting:

LASER LINK (Red LED is lit)

1. IR Video Carrier Frequency Adjustment (VC-195 board)

Mode	Camera standby
Subject	Arbitrary
Measurement Point	Pin ⑤ of CN003 of IR receiver jig (RF) (Or Pin ⑩ of IC751 of VC-195 board)
Measuring Instrument	Frequency counter
Adjustment Page	F
Adjustment Address	68
Specified Value	$f = 11.85 \pm 0.05 \text{ MHz}$

Connection of Equipment

Connect the measuring device as shown in the following figure, and adjust.

Fig. 5-3-18.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 37, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: F, address: 68, change the data, and set the video carrier frequency (f) to the specified value.
- 4) Press the PAUSE button of the adjusting remote commander.
- 5) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

2. IR Video Deviation Adjustment (VC-195 board)

Mode	Camera standby
Subject	Arbitrary
Measurement Point	VIDEO OUT terminal of IR receiver jig (Terminated at 75Ω)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	66
Specified Value	$A = 0.87 \pm 0.04 \text{ V}$

Connection of Equipment

Connect the measuring device as shown in the following figure, and adjust.

Fig. 5-3-19.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 39, and press the PAUSE button of the adjusting remote commander.
- 3) Select page: F, address: 66, and change the data, set the video signal amplitude (A) to the specified value.
- 4) Press the PAUSE button of the adjusting remote commander.
- 5) Select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-20.

3. IR Audio Deviation Adjustment (VC-195 board)

Mode	VTR recording
Signal	Audio signal : 400Hz, -7.5dBs : L or R of AUDIO terminal Video signal : Color bar signal : VIDEO terminal
Measurement Point	AUDIO L terminal and AUDIO R terminal of IR receiver jig (Terminated at 47kΩ)
Measuring Instrument	Audio level meter
Adjustment Page	F
Adjustment Address	67
Specified Value	Signal level: -7.5±2.0dBs

Connection of Equipment

Connect the measuring device as shown in the following figure, and adjust.

Preparations only for the model without REC switch:

- 1) Select page: 0, address: 01, and set data: 01.
- 3) Select page: D, address: 14, after memorizing the data, set the bit value of bit1 to "1". (Refer to "3. Bit value discrimination" of "3-1-8. Service Mode").
- 4) Select page: D, address: 15, after memorizing the data , set the bit value of bit7 to "0".
- 5) Turn off the HOLD switch of the adjusting remote commander, and press the REC buttons and set to recording mode.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Connect the audio level meter to the AUDIO L terminal of the IR receiver jig.
- 3) Select page: F, address: 67, change the data and set the 400Hz audio signal level to the specified value.
- 4) Press the PAUSE button of the adjusting remote commander.
- 5) Connect the audio level meter to the AUDIO R terminal of the IR receiver jig.
- 6) Check that the 400Hz audio signal level is within the specified value. If outside, repeat from step 2).
- 7) Select page: 0, address: 01, and set data: 00.

Processing after completed adjustment: only for the model without REC switch:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 14, and set the data memorized at step 3) of "Preparations only for the model without REC switch".
- 3) Press the PAUSE button of the adjusting remote commander.
- 4) Select page: D, address: 15, and set the data memorized at step 4) of "Preparations only for the model without REC switch".
- 5) Press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-21.

3-6. STEREO AUDIO SYSTEM ADJUSTMENT (CCD-TR917/ TR940/ TR940PK)

- Perform the adjustment using the color bar signal as a video signal input for VIDEO terminal.
- The items to be adjusted for the R channel will be indicated within the [], in regard to the adjusting items to be adjusted for both L and R channels.
- Set the Hi-Fi sound switch in the menu display to "STEREO" position unless specified otherwise.

Note:

- 1) When inputting the audio signal, input the same signal to both the L and R channels, unless specified otherwise.
- 2) Be sure to insert the plug (Shorting plug or dummy plug, etc) into the AUDIO terminal (Right). If the plug is not inserted, the monaural mode will be set, and correct adjustments can not be carried out.

[Monaural mode]

During recording REC AFM RF 1.7MHz carrier will not be output.

During playback The L+R signal will be output from the AUDIO terminal (Left).

[Connecting the measuring instruments for the audio]

Connect the audio system measuring instruments in addition to the video system measuring instruments as shown in Fig. 5-3-22, and perform adjustments at the power switch [VTR] or [PLAYER] position.

[Adjustment Procedure]

- 1) 1.5 MHz deviation adjustment
- 2) 1.7 MHz deviation adjustment
- 3) BPF adjustment

Fig. 5-3-22.

1. 1.5 MHz Deviation Adjustment (VC-195 board)

Sets the spectrum of the L-ch ((L+R)/2 signal) level modulated during recording. If deviated, the crosstalk signal of the audio signal will occur and the audio level will drop during both playback and recording.

Mode	VTR recording
Signal	Input the AFM DEV jig output signal to the left and right audio input terminal
Measurement Point	CH1: AFM DEV jig TP31 CH2: AFM DEV jig TP3
Measuring Instrument	Oscilloscope ADD mode CH2 INV mode
Adjustment Page	F
Adjustment Address	45
Specified Value	The level difference between CH1 signal and CH2 signal should be minimum.

Connection:

- 1) Connect TP24 and TP26 of the AFM DEV jig to CN910 of the VC-195 board.
TP24(GND) Pin ⑧ of CN910
TP26(RF SWP) Pin ⑪ of CN910
- 2) Connect TP25 (REC AFM) of the AFM DEV jig to Pin ⑳ of IC301 with a 0.01 μ F capacitor (1-101-004-00).
- 3) Connect the audio output terminal (J1 and J2) of the AFM DEV jig to AUDIO terminal of the unit.
- 4) Connect TP28 (DC), TP27 (GND) of the AFM DEV jig to the DC power supply (+7Vdc to +9Vdc).
- 5) Set the AFM DEV jig switches to the following positions.
S1 BIL Position
S2 NT Position
S3 SIN Position

Adjusting method :

- 1) Match the vertical ranges of CH1 and CH2 of the oscilloscope to each other.
- 2) Set the oscilloscope to the ADD mode and CH2 to the INV (invert) mode.
- 3) Select page: 0, address: 01, and set data: 01.
- 4) Select page: F, address: 45, change the data and minimize the audio signal level difference (A).
- 5) Press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-23.

2. 1.7 MHz Deviation Adjustment (VC-195 board)

Sets the spectrum of the R-ch ((L-R)/2 signal) level modulated during recording. If deviated, the crosstalk signal of the audio signal will occur and the audio level will drop during both playback and recording.

Mode	VTR recording
Signal	Input the AFM DEV jig output signal to the left and right audio input terminal
Measurement Point	CH1: AFM DEV jig TP32 CH2: AFM DEV jig TP2
Measuring Instrument	Oscilloscope ADD mode CH2 normal mode
Adjustment Page	F
Adjustment Address	46
Specified Value	The level difference between CH1 signal and CH2 signal should be minimum.

Connection:

- 1) Connect TP24 and TP26 of the AFM DEV jig to CN910 of the VC-195 board.
TP24 (GND) Pin ⑧ of CN910
TP26 (RF SWP) Pin ⑪ of CN910
- 2) Connect TP25 (REC AFM) of the AFM DEV jig to Pin ⑳ of IC301 with a 0.01 μ F capacitor (1-101-004-00).
- 3) Connect the audio output terminal (J1 and J2) of the AFM DEV jig to AUDIO terminal of the unit.
- 4) Connect TP28 (DC), TP27 (GND) of the AFM DEV jig to the DC power supply (+7Vdc to +9Vdc).
- 5) Set the AFM DEV jig switches to the following positions.
S1 BIL Position
S2 NT Position
S3 INV Position

Adjusting method :

- 1) Match the vertical ranges of CH1 and CH2 of the oscilloscope to each other.
- 2) Set the oscilloscope to the ADD mode and CH2 to the normal mode.
- 3) Select page: 0, address: 01, and set data: 01.
- 4) Select page: F, address: 46, change the data and minimize the audio signal level difference (A).
- 5) Press the PAUSE button of the adjusting remote commander.
- 6) Select page: 0, address: 01, and set data: 00.

Fig. 5-3-24.

3. BPF f0 Adjustment (VC-195 board)

Sets the BPF passing frequency so that the AFM signal can separate from the playback RF signal properly. If deviated, the mono/stereo mode will be differentiated incorrectly, and noises and distortions will increase during high volume playback.

Mode	Playback
Signal	Alignment tape: For BPF adjustment (WR5-11NS)
Measurement Point	Audio output terminal left or right
Measuring Instrument	distortion meter
Adjustment Page	F
Adjustment Address	47
Specified Value	The Main and Sub channel distortion rate should be almost the same (within $\pm 1\%$) and minimum.

Adjusting method :

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Set the Hi-Fi sound switch (menu display) to "2".
- 3) Select page: F, address: 47, change the data and minimize the distortion rate.
- 4) Press the PAUSE button of the adjusting remote commander.
- 5) Set the Hi-Fi sound switch (menu display) to "1".
- 6) Select page: F, address: 47, change the data and minimize the distortion rate.
- 7) Press the PAUSE button of the adjusting remote commander.
- 8) Repeat steps 2) to 7) and set the data of address: 47 so that the distortions rates when the Hi-Fi sound switch is set to "2" and set to "1" respectively are almost the same and minimum.
- 9) Press the PAUSE button of the adjusting remote commander.
- 11) Select page: 0, address: 01, and set data: 00.
- 12) Set the Hi-Fi sound switch to "STEREO".

3-7. MONAURAL AUDIO SYSTEM ADJUSTMENT MONAURAL (CCD-TR57/TR67/TR87/TR413PK/ TR414PK)

[Connecting the measuring instruments for the audio]

Connect the audio system measuring instruments besides the video system measuring instruments as shown Fig. 5-3-25.

Fig. 5-3-25.

1. 1.5 MHz Deviation Adjustment (VC-195 board)

Adjust to the optimum audio FM signal distortion.

If the adjustment is not correct, its playback level will differ from that of other units.

Mode	Playback
Signal	Alignment tape: For checking the operation (WR5-5NSP)
Measurement Point	Audio output terminal
Measuring Instrument	Audio level meter
Adjustment Page	F
Adjustment Address	45
Specified Value	-7.5±0.5dBs

Adjusting method :

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: F, address: 45, change the data and set the 400Hz signal level to the specified value.
- 3) Press the PAUSE button of the adjusting remote commander.
- 4) Select page: 0, address: 01, and set data: 00.

2. BPF Adjustment (VC-195 board)

Adjust to the optimum audio BPF characteristics of the IC.

If the adjustment is not correct, the distortion rate and S/N ratio will worsen.

Mode	Playback
Signal	Alignment tape: For BPF adjustment (WR5-11NS)
Measurement Point	Audio output terminal
Measuring Instrument	distortion meter
Adjustment Page	F
Adjustment Address	47
Specified Value	The distortion rate should be and minimum.

Adjusting method :

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: F, address: 47, change the data and minimize the distortion rate.
- 3) Press the PAUSE button of the adjusting remote commander.
- 4) Select page: 0, address: 01, and set data: 00.

3-8. ARRANGEMENT DIAGRAM FOR ADJUSTMENT PARTS

VC-195 BOARD (SIDE A)

VC-195 BOARD (SIDE B)

SECTION 6 REPAIR PARTS LIST

6-1. EXPLODED VIEWS

NOTE:

- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- The mechanical parts with no reference number in the exploded views are not supplied.

The components identified by mark Δ or dotted line with mark Δ are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque Δ sont critiques pour la sécurité.

Ne les remplacer que par une pièce portant le numéro spécifié.

6-1-1. CABINET (L) BLOCK ASSEMBLY

6-2. ELECTRICAL PARTS LIST

Note:

The components identified by mark Δ or dotted line with mark Δ are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque Δ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

When indicating parts by reference number, please include the board name.

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX, -X mean standardized parts, so they may have some difference from the original one.
- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- RESISTORS
All resistors are in ohms
METAL: Metal-film resistor
METAL OXIDE: Metal Oxide-film resistor
F : nonflammable

- SEMICONDUCTORS
In each case, u: μ , for example:
uA...: μ A..., uPA...: μ PA..., uPB...: μ PB...,
uPC...: μ PC..., uPD...: μ PD...
- CAPACITORS
uF : μ F
- COILS
uH : μ H
- Abbreviation
Canadian model is abbreviated as CND.
